Since King Louis the Great founded the first Hungarian University in Pécs in 1367 the city has functioned as an educational center of the country and the region with longer and shorter interruptions. With its 20,000 students and 500 different study programs the University of Pécs (UP), the oldest university in Hungary, is one of the largest institutions of higher education in the country. The highly qualified academic staff is a guarantee that students are provided with the most up-to-date knowledge to the highest, internationally recognized standards and so earn a degree which is highly competitive in today's labor market.

The University has conducted degree programs in English for more than 30 years and so has become one of the most internationalized universities in Hungary. We are proud to host over 4,000 international students coming from more than 100 countries of the world.

Our international students can choose from more than 50 English and Germantaught degree programs presented in this brochure. Besides being the oldest university in the country, the University of Pécs has earned a prominent position in terms of international excellence as well. The entire institution, as well as many of our faculties and study programs took leading positions in highly recognized international rankings:

Ranked among
TOP5
Hungarian universities

of international higher education institutions worldwide (Source: Center for World University Rankings, 2016)

The University of Pécs functions as a knowledge center for innovation in the South Transdanubian Region. Nearly 2,000 teaching and research staff members participate in research projects at our 10 faculties. 22 doctoral schools offer PhD and DLA degrees that cover a wide spectrum of sciences. UNIVERSITY OF PÉCS international.pte.hu

Have a stimulating, challenging and academically rewarding experience!

Well-known and recognized professors, well-equipped classrooms and dormitories at the University of Pécs enable you to get the best out of your period of study abroad. Whether you are learning a new language or doing scientific research, the University puts the tools you need at your disposal. Our university represents classical values while successfully adapting to the present and using diverse methods of teaching.

Level of degrees and recognition

In September 2006, a modern higher educational training system initiated by the European Union was introduced in Hungary too, known as the Bologna process, which offers students an opportunity to pursue their studies in a dynamically developing, flexible European higher educational system. The traditional college and university level training programs were replaced by a three-tier system consisting of a basic training program (BA, BSc), a master level program (MA, MSc), and doctoral level (PhD, DLA) program. The first cycle programs last 6-8 semesters (3-4 years, 180-240 credit points) and lead to a Bachelor's degree. The second cycle programs lead to a Master's degree and last 2-4 semesters (1-2 years, 60-120 credit points). One-tier, undivided, long-term Master's degree programs (5 to 6 years) are offered in some fields of study, e.g. in human medicine, dentistry, pharmacy, veterinary medicine, architecture, law and in a few programs of art education. All Bachelor's and Master's degrees grant access to the labor market. A four-year doctoral program is a postgraduate alternative that may follow any Master's or equivalent qualification. The university offers shorter programs as well, such as preparatory programs, summer universities and partial trainings. In addition, it attaches great importance to training in the colleges for advanced studies. Nearly every faculty offers training in the framework of this organization that encourages students to pursue their own research.

Due to the European Credit Transfer System (ECTS), which was introduced in September 2003, credits and degrees earned in Hungary are transferable to other European institutions and vice versa. In addition to the diploma, students are also provided with a special supplement that is recognized all over the European Union.

In order to ensure high international standards, strict quality control measures are applied. The Hungarian Accreditation Committee (HAC) conducts continuous institutional and program accreditation procedure and monitors the quality of educational activity for compliance the European Standards and Guidelines. Hungarian higher education institutions and courses are accredited by HAC. For more information on Hungarian higher education, please, visit our website:

Study in Hungary

Basic information

Official name:

Hungary

(in Hungarian: Magyarország)

Official language:

Hungarian

Form of state:

Parliamentary republic

Capital:

Budapest

(population: 1.7 million)

Area:

93,030 km²

Population:

9.9 million

Neighboring countries:

Austria, Slovakia, Ukraine, Romania, Serbia, Croatia, Slovenia

Time zone:

Central European Time (GMT+1)

EU accession:

1 May 2004

Currency:

Forint (HUF)

Hungary is a beautiful landlocked EU country situated in the Carpathian Basin, in the middle of the continent. Despite being rather small, its beneficial Central European position makes the country an appealing destination to live, work or study. Hungary has much to offer for visitors, from the architectural and cultural delights of historic cities, to vineyard–covered hills, freshwater lakes and therapeutic mineral springs. This small country is one of the oldest in Europe where 2000-year-old Roman ruins and 400-year-old Turkish monuments can be found side by side.

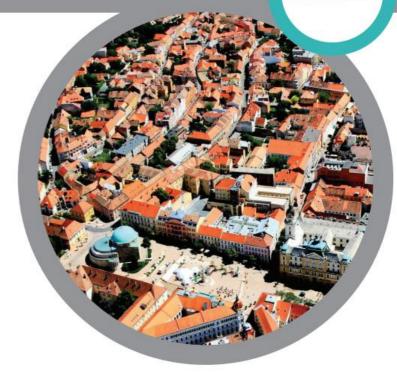

Hungarian higher education has represented academic excellence for more than 600 years. The country's first university was founded in Pécs in 1367, around the same time as other Central European universities, such as those in Prague, Cracow and Vienna.

Hungary is a member of the European Union, NATO, OECD, the Visegrad Group and the Schengen Convention.

UNIVERSITY OF PÉCS international.pte.hu

City of Pécs

The University of Pécs is located in the uniquely beautiful and lively city of Pécs – a proper, multi-campus university town – which was designated to be European Capital of Culture in 2010. The large international student population has become an essential part not only of the university but also of the city's everyday life.

Through the traditions of the first Hungarian university, Pécs is a center of science and education and it is a frequent host of domestic and international conferences and symposia. In terms of entertainment and events, the city offers a huge number of activities, excursions and festivals for everyone, regardless of taste or budget.

How to get to Pécs?

Pécs, the fifth largest city in Hungary with a population of about 150,000, is a real Mediterranean beauty. It is situated in South Transdanubia, close to the Croatian border. The easiest way to reach Hungary from distant countries is by plane. There are flights to Budapest, the capital of Hungary, from

all major air-hubs in Europe. To reach Pécs from the capital one can take an intercity train or use a minibus shuttle, which is a direct transportation service from the airport to any address in Pécs.

Getting around

One of the great things about being a student in Pécs is that you can easily explore the city on foot or by bike. Pécs has convenient bus transportation and a 24-hour taxi service. Students are entitled to get a student discount (50%) from the original price of the monthly bus pass (≈EUR 22) with their Hungarian Student ID cards.

Weather

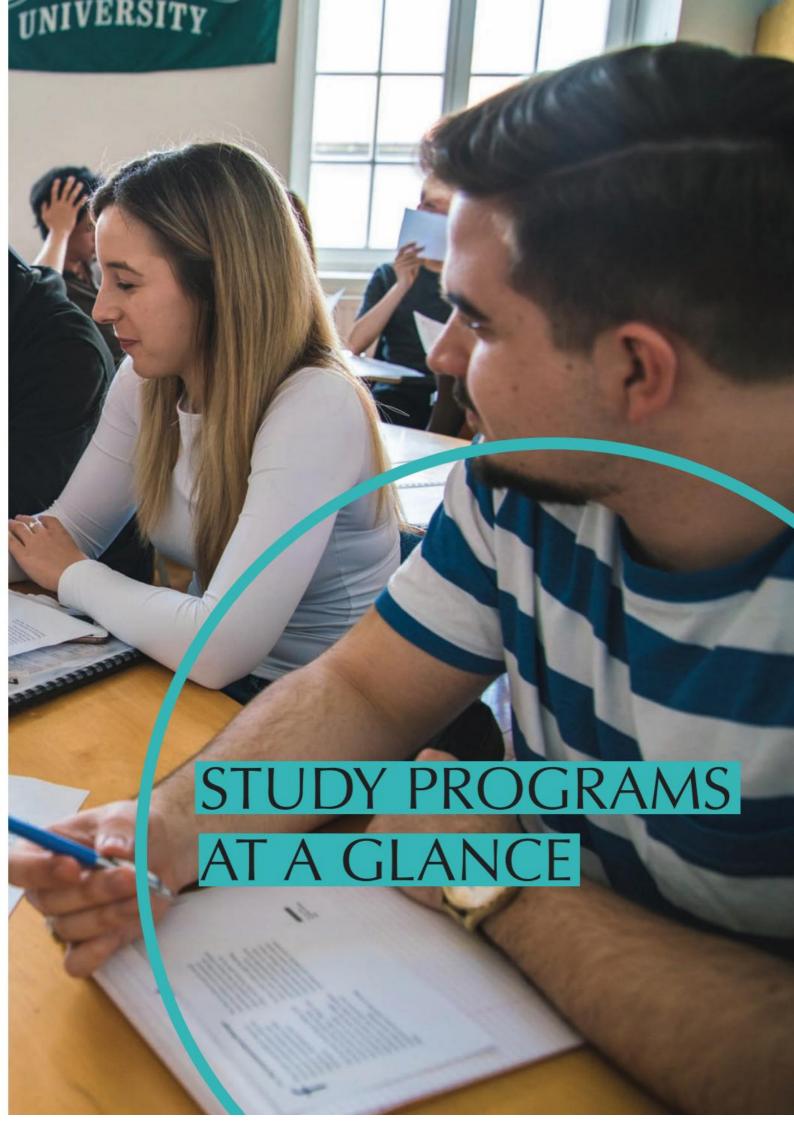

Pécs has a temperate climate with a snowy, cold winter and a sunny, hot summer, ranging from minimum -5°C in winter to maximum +30°C in summer. It also has beautiful autumn and spring seasons. In South Transdanubia, spring arrives early and we can enjoy the benefits of late summer days - Indian summer - which can last even nutil November.

The University of Pécs has a uniquely wide range of international programs to offer for degree-seeking international students. At present all the ten Faculties offer various international degree programs, taught mostly in English but also in German. These programs can be characterized by their high academic quality and by their very competitive tuition fees.

International Degree Programs in English:

	BA/BSc	MA/MSc	OTM ¹	PhD

			General Medicine
Medical Sciences			Dentistry
			Pharmacy

- A postgraduate specialist training is a non-degree program, based on a first or second degree. Through the completion of 60 to 120 credits a specialized qualification can be obtained. The duration of the program is 2-4 semesters.
- ³ The Bachelor of Education (BEd) is a post-degree program designed to provide the variety of courses and extended field experiences through which students can develop the knowledge and skills needed to teach in the modern classroom.

'I've found a second home! Studying at the University of Pécs has exposed me to such a vast pool of resources, both academically and socially. I get to be taught by very nice and experienced professors. I also get to learn new cultures and make friends from all over the world. I love Pécs.'

Joshua Wambua, Kenya, Computer Science Engineering BSc UNIVERSITY OF PÉCS international.pte.hu 13

Why Choose the University of Pécs?

If you choose the University of Pécs you will...

...experience a high quality of teaching.

...study at **the oldest university in Hungary** - founded in 1367 - having exceptionally wide-ranging experience and long-standing traditions in higher education.

...be awarded a valuable EU degree.

...choose from our professionally relevant and high quality programs for a tuition fee that represents **great value for money**.

...study in a multicultural environment.

...enjoy low living expenses.

...experience vibrant student life day and night in this true University City, full of bars, restaurants and cafés.

...study at one of the largest higher education institutions in Hungary together with 20,000 other students.

...live in a uniquely beautiful place -Pécs was awarded the prestigious title "European Capital of Culture" in 2010.

> ...walk among the historical buildings in the city of Pécs, which is part of the UNESCO World Heritage.

...study in a very safe and friendly city located in one of the safest countries in Europe.

...get a **Central European experience** and discover further European countries easily during your studies at UP.

The growing number of our international students is the best proof and guarantee of the advantages offered by our institution. international.pte.hu

Admission to International Programs

Eligibility

Preparatory courses	In order to be offered a place in a preparatory course, you must have successfully completed your upper secondary (high school) education or have been awarded a college degree.
Bachelor Programs	In order to be offered a place in a bachelor's (first cycle or undergraduate) program, you must have successfully completed your upper secondary (high school) education and be able to demonstrate at least upper-intermediate proficiency in the language of instruction.
Bachelor of Education (BEd) Training	In order to be offered a place in BEd training, you must have been awarded a Bachelor's degree in Teaching by an internationally recognized university and be able to demonstrate at least upper-intermediate proficiency in the language of instruction.
Master Programs	In order to be offered a place in a master's (second cycle or graduate) program, you must have been awarded a Bachelor's degree by an internationally recognized university and be able to demonstrate at least upper-intermediate proficiency in the language of instruction.
Postgraduate Specialist Training	In order to be offered a place in Postgraduate Specialist Training, you must have been awarded a Bachelor's or Master's degree by an internationally recognized university and be able to demonstrate at least upper-intermediate proficiency in the language of instruction.
PhD Programs	In order to be offered a place in a PhD program, you must have been awarded a Master's degree by an internationally recognized university and be able to demonstrate at least upper-intermediate proficiency in the language of instruction.

General entry requirements

In order to be eligible for university studies in Hungary, a student must demonstrate that they meet several requirements for the course or program. There are certain general entry requirements that all students must meet and documents that applicants must submit:

	Preparatory courses	Bachelor Programs	Master Programs	Postgraduate Specialist Training	PhD Study Programs
Certificate of the previous studies	Secondary school leaving certificate	Secondary school leaving certificate	BA/BSc degree	BA/BSc degree	MA/MSc degree
Transcript of previous studies	✓	✓	✓	✓	✓
At least upper- intermediate proficiency in the language of instruction	ž	✓	✓	✓	✓
CV in the language of instruction	✓	✓	✓	✓	✓
Motivation letter in the language of instruction	-	✓	✓	✓	✓
Admission examination	Placement test and a Skype interview	Admission examination interview	Admission examination interview	Admission examination interview	Admission examination interview

In addition, there are entry requirements that are specific to the course the student is applying for. For example, an engineering course may require a higher level of previous maths studies. Information on the specific entry requirements can be found on the study program's page on the University's website: www.international.pte.hu.

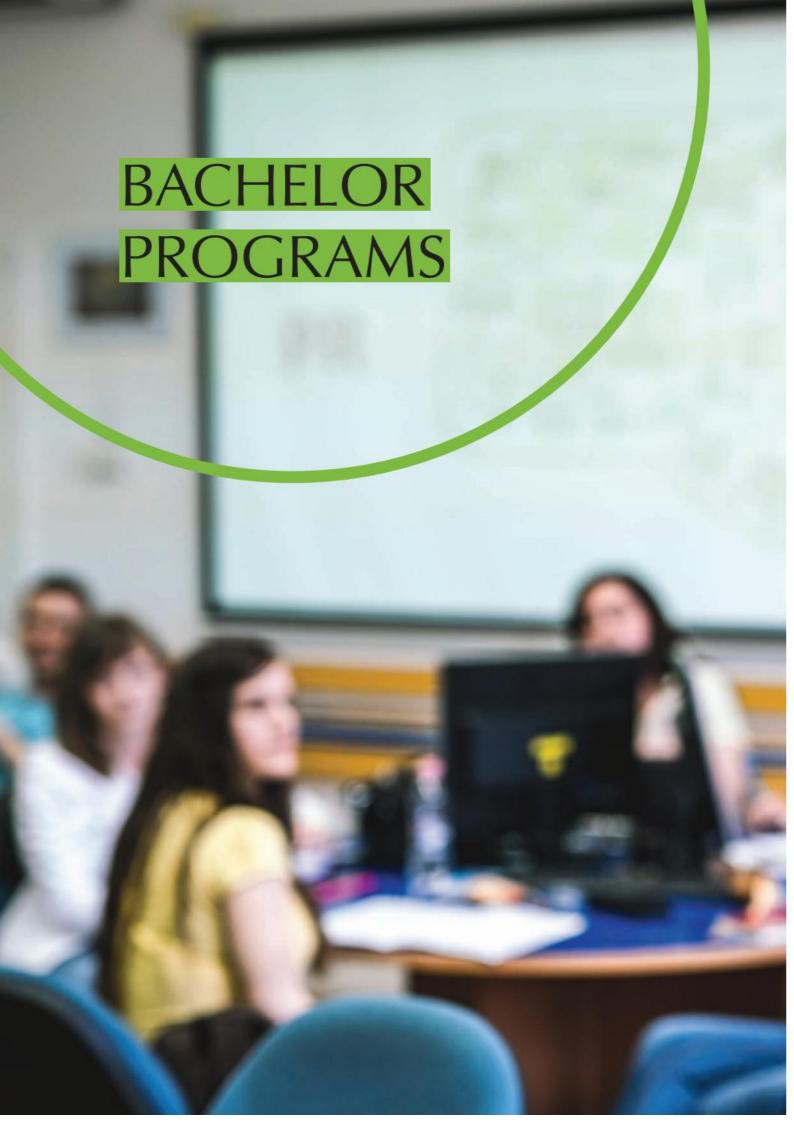

Application

From 2018, applications can be submitted through our online application site.

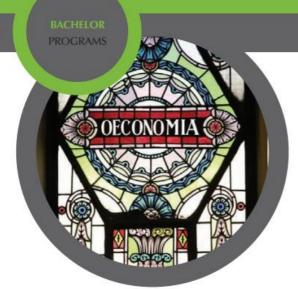

To start the process, just visit the www.apply.pte.hu website* and follow the steps below:

- Choose your favorite program, learn about the fees and entrance requirements.
- Click on 'Apply Now' and start your application.
- Register on our application site, fill the application form, upload the necessary documents and submit your application!
- After you have submitted your application, you are going to receive a notification about the application fee payment.
- 5. When we receive your application fee, we start the evaluation of your application and invite you to the entrance exam or Skype interview.
- If you succeed on the entrance exam/Skype interview, you receive the Conditional Acceptance Letter and a notification about the tuition fee payment.
- 7. When we receive your tuition fee, we issue you the Letter of Admission and you can start arranging your travel to Pécs!

^{*} Please note, that the application for the programmes of the Medical School (General Medicine, Pharmacy, Dentistry, Biotechnology, Humanmedizin, Zahnmedizin, Pharmazie) goes on a different surface. You can learn more about it at: admissions.medschool.pte.hu

Business Administration BSc

Faculty of Business and Economics

Deadline of application:

30 June

Starting date:

September

Tuition fee:

EUR 2,950 per semester for non-EU citizens and EUR 1,150 for EU citizens

Application fee:

EUR 100

Registration fee:

779 GBP -1540 GBP (depending on the number of students) (to be paid once in the first semester of the studies)

Degree:

Bachelor of Sciences in Business Administration

Duration of training:

6 semesters (for the Middlesex University Degree) or 7 semesters (for the Hungarian University Degree)

Language of instruction:

English

Description of the program:

This program is designed for students who are interested in business studies and want to pursue a business career. The program is conducted in an innovative way, including not only lectures but also case studies. practical tasks and teamwork as well. The program has a sizeable number of guest lecturers from Europe and the United States. One special feature of the program is that it is validated by the Middlesex University, London. Upon successful completion of their studies students will obtain two degrees, one Hungarian and one British from Middlesex University, London. By carefully selecting the optional modules students may acquire a better overall knowledge of a chosen field such as marketing, management or finance.

The aim of the program is not simply to teach Economics, but, more importantly, to prepare students for the 21st-century challenges of the business world and the global market.

Examples of subjects during the studies:

Dietetics BSc

Faculty of Health Sciences

Degree:

Bachelor of Science in Dietetics **Duration of training:**

8 semesters

Language of instruction: English

Description of the program:

Obese people have to fight several diseases that are connected with their weight (cardiovascular diseases, diabetes, and cancer). If you have the drive to help them, dietetics will provide you the required knowledge. Healthy eating – and thus the knowledge of a dietitian – is essential to prevent and successfully treat several diseases, as medications or a surgery rarely provide a complete solution. Patients are often forced to stop eating their favorite treats, and a dietitian may greatly contribute to the patients' treatment, balance and well-being by offering enjoyable but healthy dietary options.

Examples of subjects during the studies:

Clinical Dietetics for Internal Medicine Dietetics of Infancy and Childhood Diseases

Nutrition Management

Technical Knowledge Relating to Catering Institutions

Food Product Chemistry

and Biochemistry

Food Knowledge and -Technology

Food Preparation Technology

and Colloidics

Practical Dietetics

Economics of Housekeeping

Public Nutrition

Finances

Surgical Clinical Dietetics

Specialized Clinical Dietetics

Nutritional Psychology

Nutritional Science, Politics and Epidemiology

Deadline for application:

Biology BSc Faculty of Sciences

Deadline for application: 30 June

Starting date:

September

Tuition fee: EUR 2,500 per semester

Application fee:

EUR 140

Degree:

Bachelor of Science in Biology **Duration of training:**

6 semesters

Language of instruction: English

Description of the program:

The study program offers complete education in biology with core subjects covering neurobiology, genetics, microbiology, animal and plant ecology, botany, zoology, and plant physiology. Fields of specialization in the second year include two modules: infra-individual (meaning more laboratory practice and cellular biology) and supra-individual (meaning more ecology) courses. Each module comprises 5-8 subjects taught through lectures, seminars and laboratory sessions. The foundation subjects are presented through lectures, seminars and laboratory sessions. The program provides a wider view of the related scientific fields (chemistry and physics). Students will familiarize themselves with the most modern instrumentation in our new research center. The program covers all aspects of education, research and innovation in the fields of biomedical, natural and environmental sciences. It also provides opportunity to join the research work going on in 22 different research groups.

Examples of subjects during the studies:

1st semester

Biological Laboratory Fundamentals

Plant Anatomy and Morphology

Cell Biology

2nd semester

Organic Chemistry

Zootaxonomy

Plant Taxonomy and Systematics

3rd semeste

Biochemistry

Comparative Physiology

General Ecology

4th semester

Biochemistry laboratory

Plant Physiology

Microbiology

5th semester

Biogeography

Basic Genetics

Molecular Biology

6th semester

Nature Conservation and Environmental

Protection

Evolution

Ethology

Chemistry BSc

Faculty of Sciences

Degree:

Bachelor of Science in Chemistry Duration of training:

6 semesters

Language of instruction: English

Description of the program:

The study program offers complete education in chemistry, with core subjects covering inorganic and organic chemistry, analytical and environmental chemistry, and physical chemistry. Specialized courses include instrumental analysis, advanced organic chemistry and physical chemistry measurements. Foundation courses aimed at providing through knowledge in mathematics, chemometrics, basic theoretical chemistry and biochemistry complete the curriculum. The subjects are presented in the form of lectures (theoretical background to the topics, with the aim to provide a wider view of chemical application), seminars (providing space for the discussion of the topics and practicing chemical calculation), and laboratory session. The students will deepen their knowledge with the help of the most modern instrumentation.

Examples of subjects during the studies:

1 º semester					
1 SCHILLSICH	31	·c	m	PCI	er

Fundamentals of Chemistry

Informatics

General and Inorganic Chemistry

2^m semester

Physics

Mathematics

Physical Chemistry

2rd comos

Analytical Chemistry

Crystallography

Carbon Nanostructures

4th semester

Petrology

Materials Sciences

Chemical Sensors

5th semeste

Applied Chemistry

Theoretical Chemistry

Quantum Theory in Structure

Determination

6th semester

Environmental Chemistry

Colloid Chemistry

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 2,500 per semester

Application fee:

EUR 140

Computer Science BSc

Faculty of Sciences

Deadline for application: 30 June

Starting date:

September

Tuition fee: EUR 2,500 per semester

Application fee:

EUR 140

Degree:

Bachelor of Science in Computer Science Duration of training:

6 semesters

Language of instruction: English

Description of the program:

The Computer Science BSc program offers full 3-year-education in computer science and programming. The aim of the course is to train students who will be able to work in the IT sector as coders or software developers, or continue their studies at a master (MSc) level. Core subjects include Discrete Mathematics, Calculus, Linear Algebra, Numerical Analysis, Probability and Statistics, Mathematical Logics, System Design, Programming Methodology, Programming Languages, Software Technology, Computer Architecture, Operating System, Networking, Theory of Databases, etc. Having collected 90 credits from the core subjects, is the student has a choice between an academic and an applied specialization. The academic specialization is more focused on applied and fundamental mathematical issues such as operations research, advanced theory of algorithms, etc., while the applied one is concerned with actual software development technologies. Both specializations offer flexibility in the choice of courses according to the students' interest.

Examples of subjects during the studies:

st comester

Discrete Mathematics

Calculus

Linear Algebra

2nd semester

Probability and Mathematical Statistics

Algorithms and Data Structures

Software Technology

3rd semester

Introduction to Computer Science

Formal Languages and Automaton

Software Technology

4th semester

Systems Design

Programming Languages

Computer Networking

5th semester

Distributed Systems and Parallel Programming

Advanced Database Design

6th semester

Operating Systems

Information System Architecture

Data Mining Shells in Business Planning

Geography BSc

Faculty of Sciences

Degree:

Bachelor of Science in Geography Duration of training:

6 semesters

Language of instruction: English

Description of the program:

The study program offers complete education in geography, with optional speciaizationsl in Landscape and Environmental Studies, Regional and Settlement Development and also Tourism. All three specializations are supported by a strong GIS basis. The program provides general bachelor level education in geography. It includes foundation modules providing an introduction to natural and social sciences, geology and geography. The core program is based on fundamental issues of including topics in Physical, Human and Regional geography. Advanced courses can be chosen from the subjects offered for the given specialization. Besides the compulsory courses students also have to choose from elective courses to help them in their specialization. The courses usually consist of two parts: a lecture and a problem-solving seminar, each worth 1 to 4 credits, depending on the nature of the topic.

Examples of subjects during the studies:

1st semester

Introduction to Human Geography

Historical Geography

Planetology

2nd semester

Meteorology and Climatology

Geomorphology

Population and Settlement Geography

3rd semester

Pedology and Hydro-geography

Biogeography

Political Geography

4th semester

Physical Geography of Europe

Human Geography of Europe

Regional Policies

5th semeste

Regional Human Geography

of the Continents

Urban Development and Planning

Regional Geography of Tourism

6th semester

Rural Development

Tourism Marketing

Environmental Impact Assessment

Specializations

Regional and Urban Development

Tourism Geography

Environmental Geography

Deadline for application: 30 lune

Starting date:

September

Tuition fee: EUR 2,500 per semester

Application fee:

EUR 140

Degree:

Bachelor of Science in Mathematics

Duration of training:

6 semesters

Language of instruction: English

Description of the program:

The Mathematics BSc program offers full 3-year-education in mathematics. The course provides general bachelor level education in mathematics, which can serve as a basis for further studies in mathematics or computer science. The basic courses include: Logics, Computer Science, Linear Algebra, Number Theory, Calculus, Geometry, Probability Theory and Statistics and Game Theory. The advanced courses include Mathematical Programming and Operations Research, Group Theory, Computer Algebra, Numerical Methods, and Applied Computer Science. The courses usually comprise two parts: a lecture and a problem-solving seminar, each worth 2 or 3 credits, depending on the nature of the course.

Examples of subjects during the studies:

Linear Algebra

Introduction to Algebra and Number

Theory

Introduction to Analysis

Introduction to Geometry

Algebra and Number Theory

Analysis

Geometry

Combinatorics

Foundations of Mathematics

Probability Theory and Mathematical

Statistics

Programming

Elementary Mathematics

History of Mathematics

Electives

Game Theory

English Mathematical Terminology

Counting Problems

Graphic Topology

Lectures from the Theory of Infinite Series

Physics BSc

Faculty of Sciences

Degree:

Bachelor of Science in Physics Duration of training:

6 semesters

Language of instruction: English

Description of the program:

The Physics BSc program offers full 3-yeareducation in physics. The study program provides complete education in physics, with the possibility of specialization in IT in Physics and Applied Physics (with a strong emphasis on laser physics). The curriculum is organized into modules covering introductory courses to natural sciences and common core courses for all physics students (basic courses in mathematics, physics and informatics). The courses related to the specialization in Applied Physics cover advanced topics in experimental and theoretical physics as well as the necessary courses in mathematics and informatics. The focus of the specialization in Informatics in Physics is data acquisition, signal processing in LabView, database management and programming in C# language. The students will familiarize themselves with the most modern instrumentation.

Examples of subjects during the studies:

1st semester

Computer Technology

Linear Algebra

Introductory Mechanics Lecture

2nd semester

Calculus

Thermodynamics

Waves and Optics

3rd semester

Electricity and Magnetism

Modern Physics

Metrology

4th semester

Classical Mechanics

Physics and Electronics

Numerical Methods

5th semester

Electronics

Electrodynamics

Discrete Mathematics

6th semeste

Terahertz Spectroscopy

Quantum Mechanics

Modern Optics

Deadline for application: 30 June

Starting date: September

Tuition fee: EUR 2,500 per semester

Application fee: EUR 140

Degree:

Bachelor of Science in Earth Sciences Duration of training: 6 semesters Language of instruction: English

Description of the program:

The Earth Sciences BSc program offers full 3-year-education in earth sciences. The program provides general bachelor level education in earth sciences and also offers the possibility to specialize in Geology. It includes introductory modules to Nature Sciences, Geology and also Geography. The core of the program is based on the fundamental issues of earth sciences and includes topics in Astronomy, Cartography, Geomorphology, Geophysics, Geochemistry, Hydrology, Meteorology, Palaeontology, Paleoclimatology, Remote Sensing, Stratigraphy, etc. while a strong regional geographical aspect is also present. The program also includes a variety of human geographical courses.

Examples of subjects during the studies:

1 st semester
Biogeography
Meteorology
Astronomical Geography
Climatology
Geomorphology
Historical Geology and Paleontology
3 rd semester
Paleoclimatology
Digital Mapping
Systematic Mineralogy
4 th semester
Soil and Rock Physics
Petrographic Microscopy
Igneous and Metamorphic Petrology
5 th semester
Environmental Geology Basics
Geology of Energy Resources
Geochemistry
6 th semester
Geology of Hungary

Physical Training BSc

Faculty of Sciences

Degree:

Bachelor of Science in **Physical Training**

Duration of training:

6 semesters

Language of instruction: English

Description of the program:

The general aim of the program is to train students to become coaches. Trainers who gain a well-established theoretical and practical knowledge and skills to be able to plan and implement training sessions for junior players, youth and adult athletes, too. Coaches who become responsible to select athletes, improve and guide their personality and to enhance their performance.

The curriculum is organized in five modules: team and individual sports, medical aspects of sport, social aspects of sport, sport sciences, and professional practice. Each module has approximately 5-10 subjects. Students participate in internships every semester. During the first three semesters as a visitor then later they are asked to conduct and lead workouts alongside with the teachers. The subjects are presented in lectures, seminars, practices, and laboratory work, too.

You must choose one sport specialization at the time of the application: Athletics, Handball, Basketball, Football, Swimming, Fencing (will only start in case of a sufficient number of applicants), Pentathlon (will only start in case of a sufficient number of applicants). All other sport is considered individually.

Examples of subjects during the studies:
1s semester
Anatomy I
Biochemistry
The Basics of Athletics I
2 nd semester
Human Biology
Theory of Training I
Camping and Hiking Leadership – Nature Walk
3#L2222222

International Relations BA

Faculty of Humanities

Deadline for application: 15 June

Starting date:

September

Tuition fee:

EUR 1,850 per semester

Application fee:

EUR 140

Degree:

Bachelor of Arts in International Relations Duration of training:

6 semesters

Language of instruction: English

Description of the program:

The program is designed for students who want to learn about political systems, international relations, political institutions, history and related fields. The goal of the program in International Relations is to train highly qualified experts with broad education in the social sciences who know the theoretical and practical context of international relations. Graduated students will gain practical knowledge related to the system of international organizations and relations, local governmental systems and local politics, how states and political organizations function, the world of NGOs and political parties, the types of electoral systems and forms of governments, the concept of political socialization, political culture, political communication and how the European Union works.

Examples of subjects during the studies:

1st comostor

World History in the 20th Century I-II Political Geography

Introduction to International Relations

2nd semeste

Introduction to Social Communication International Negotiation Techniques

The History of International Relations I-II.

3rd semester

Fundamentals of Political Law

Comparative Politics I-II.

International Law I-II.

4th semester

International Economics

Introduction to Diplomacy

International Civil Society

5th semester

Regionalism and Governance

The Issue of European Integration and Nations

International Studies in Practice

6th semester

Social Philosophy

Introduction to Migration Policy

Introduction to Security Policy

UNIVERSITY OF PÉCS international pte hu 3

Psychology BA

Faculty of Humanities

Degree:

Bachelor of Arts in Psychology

Duration of training:

6 semesters

Language of instruction: English

Description of the program:

At the University Pécs you may study psychology as a Single Honours degree. This can lead to careers in, for example, clinical, counselling, educational, forensic, health or occupational psychology. The skills that you will learn while studying psychology, which may be of value to you in future careers, include information finding, oral and written communication, numeracy, computer literacy, time-management, problem solving, group working and the ability to carry out independent research.

More specifically, the program's courses deal with the following disciples:

- 1. General and Cognitive Psychology
- 2. Evolutionary Psychology
- 3. Developmental Psychology
- 4. Personality Psychology
- 5. Social Psychology
- 6. Foundations of Psychological Methodology
- 7. Special Applied Fields of Psychology

Examples of subjects during the studies:

1st semester

Introduction to Psychology

Social Psychology:

Culture and Socialization

Basic Biological Knowledge

2nd semester

Evolutionary Psychology I.

The Cognitive Psychology of Attention

Human Genetics

3[™] semester

The Cognitive Psychology of Memory

Analytical Developmental Psychology Neurology

4th semester

The Cognitive Psychology of Thinking

Social Psychology of Communication

Psychometry

5th semester

Behavioral Views of Personality

Measures at Organizations

Applied Fields of Psychology

6th semester

Health Psychology

Introduction to Work

and Organization Psychology

Introduction to Psychology at Schools

Deadline for application:

15 July

Starting date:

September

Tuition fee:

for EU citizens: EUR 2,450 EUR per semester, from outside of the EU: EUR 3,450 EUR per semester

Social Work BA

Faculty of Humanities

Deadline for application: 15 June

Starting date:

September

Tuition fee: EUR 1,700 per semester

Application fee:

EUR 140

Degree:

Bachelor of Arts in Social Work

Duration of training:

7 semesters

Language of instruction: English

Description of the program:

Our study programs provide students with critical-reflective thinking skills necessary to understand the socio-cultural context of their work.

Bachelor of Social Work graduates are aware of the complexity and dynamics of social systems and human behaviour. They are committed to values and ethics of Social Work and act according to the principles of social justice. Social workers promote the development of democratic social relations and social integration.

Major modules of the programme: Theory and Practice of Social Work, Social Policy, Sociology, Economics, Social Law and Administration, Psychology, Public Health, and Education. Students are required to spend the 7th semester on placement, depending on their personal interests and institutional possibilities.

Examples of subjects during the studies:

1st semester

Welfare and Social Economy

Introduction to Societal and Social Policy

Reflective Communication Skills Training

2nd semeste

Social Context of Human Development

Special Policy Issues of Life-span Development

Contemporary Drug Policy

3rd semester

Strength-based Social Work with Individuals

Societal Processes and Social Problem

The psychology of life-span development

4th semester

Family consultation

The Application of Law in Social Work

Public Health and Epidemiology

5th semester

Addiction Studies - Drugs and Society

Foundations of Child Protection

Social Justice and Professional Ethics

6th semester

Specific Fields and Methods of Social Work Social Work with Persons with Substance Use Disorder

Introduction to Counselling

7th semester

Intensive Field Practice

For more information, please contact:

English and American Studies BA

Faculty of Humanities

Degree:

Bachelor of Arts in English and American Studies

Duration of training:

6 semesters

Language of instruction: English

Description of the program:

Our goal is to develop professionals with a high level of theoretical and practical knowledge in the field of English Studies and related areas of the Social Sciences. By obtaining their BA, students will possess a wide range of skills and knowledge:

- a thorough understanding of the English language and of English-speaking peoples and cultures worldwide,
- a high level of competence in the English language meeting the competency requirements of both the written and oral parts of the Advanced Level State Proficiency Examination.
- familiarity with basic research- and study techniques within the field of English Studies,
- the ability to translate a variety of non-field-specific texts in an intelligent manner,
- strengthen cultural ties through a creative application of their language- and problem-solving skills,
- contribute to local cultural and civic life, especially in the area of Anglophone cultural connections,
- play active roles in mass communication, media and tourism.

Examples of subjects during the studies:

1st semester

The History of Philosophy

Language Development

The Language of English Literary and Cultural Studies

2nd semester

The Language of English Linguistics

History of the United Kingdom

English Grammar in Use II.

3rd semester

Introduction to Applied Linguistics

The Structure of Present-Day English II

History of the United States

4th semester

American Literature and Culture

American Society and Culture

5th semester

Contemporary British Society and Culture

Contemporary British Literature

Introduction to Irish Culture

6th semester

British Film and Visual Culture

American Popular Culture

Introduction to Canadian Studies

Deadline for application:

15 June

Starting date:

September

Tuition fee:

EUR 1,800 per semester

Application fee:

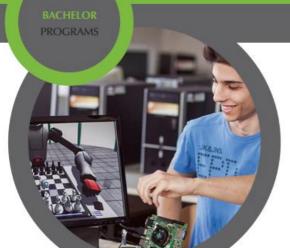

EUR 140

Computer Science Engineering BSc

Faculty of Engineering and Information Technology

Deadline for application: 15 July

Starting date:

September

Tuition fee: USD 3,400 per semester

Application fee: USD 100 Degree:

Engineering Information Technologist (BSc) Duration of training: 7 semesters Language of instruction: English

Description of the program:

The degree program provides subjects and advanced research opportunities in the sphere of computer engineering, such as software engineering, data networks, information systems, cost efficient solutions in engineering and manufacturing. Large components of the studies are laboratory oriented and covering software engineering and programming skills. The program provides experience in being part of an information technology team working on real projects. The aim of the program is to equip students with a solid skillset in modern techniques and provide quality instruction needed for a professional career in the field of information technology engineering.

Examples of subjects during the studies:

1st semester

Algorithm design

Digital logic design 1

Programming 1

2nd semester

Modelling of transport processes

Databases 1

Electronics 1

3rd semester

Introduction to computer networks

Computer architectures 1

Visual programming

4th semeste

Web programming 1

IP based systems and applications

Programming autonomous systems

5th competer

Software Technology

Control Engineering

Computer Networks

6th semester

Foundations of Information Security

Construction Management

Intelligent Systems

Specializations

Information Technology of Autonomous Systems

Computer System Administration

Civil Engineering BSc

Faculty of Engineering and Information Technology

Degree:

Civil Engineer (Bsc)

Duration of training:

8 semesters (full-time training)

Language of instruction: English

Description of the program:

This program is accredited by the Institute of Building Construction and meets the requirements of training innovative, up-todate civil engineers who will design cities with a structure after graduation. This wide scientific and engineering field covers large structures and constructions, building engineering, management of infrastructure like bridges and highways, municipal water and wastewater systems. Study of these fields comprises learning classical engineering sciences such as mathematics, natural sciences and economics. In addition to engineering subjects, the program provides training in computer and communication skills. Although most graduates are employed to work in the field of planning, design or management, they may also be involved in construction engineering, structural engineering, transportation and urban planning, or set up their own independent practice.

Examples of subjects during the studies:

1st semester

Engineering mathematics 1

Technical drawing 1

Geology for civil engineering

2nd semester

Strength of materials

Basics of structural design

Geodesy 2

3rd semester

Engineering fluid mechanics 3

Steel structures 1

Geographic information system 1

4th semester

Reinforced concrete structures 2

Planning of water supply and sewerage

Building constructions 4

5th semester

Steel Structures

Building Construction

Reinforced Concrete Structures

6th semester

Geotechnics

Underground Structures

Bridge Construction

7th semester

Industrial and Agricultural Building Design

Engineering Timber Structures

8th semester

Complex Accessibility

Computer Aided Structural Design

Electrical Engineering BSc

Faculty of Engineering and Information Technology

Deadline for application: 15 July

Starting date:

September

Tuition fee: USD 3,400 per semester

Application fee: USD 100 Degree: Electrical Engineer (BSc) Duration of training: 7 semesters

Language of instruction: English

Description of the program:

Future electrical/electronic engineers study here, who will solve high quality tasks in the field of design, manufacture and operation of electric and electronic appliances, equipment and facilities. This qualification ensures competence for performing measurement, evaluation, control and management tasks in the field of electricity. Apart from learning the bases of electrical and electronic engineering within the frame of the study at our institution the students will become members of a technology society involving them in complex projects and developments already during the university years.

Electrical Engineers owning complex knowledge are now mostly wanted in Europe. Companies acting in the most dynamically developing industry field on the Earth ranging from nuclear power plants to microelectronic companies, from small-scale teams to multi-continental firms are waiting for you.

Examples of subjects during the studies:

Metrology

Electronics Digital Circuits

Control Engineering

Computer Networks

Microelectronic Systems

Electric Energy Converters

Electric Equipment Operation

Building Informatics

Embedded Programming

Autonomous Intelligent Systems

Microcomputers

Specializations

Electrification and Automation of Facilities

Embedded Microcomputer Systems

Architecture (BSc+MSc)

Faculty of Engineering and Information Technology

If the applicant has already obtained a university degree (bachelor degree in Architecture or other relevant field), it is possible to apply for admission to the master level part of the program.

Deadline for application:

15 July

Starting date:

September

Tuition fee:

USD 3,800 per semester

Application fee:

USD 100

Degree:

Master of Science in Architecture

Duration of training:

10 semesters

Language of instruction: English

Description of the program:

This program trains students to apply their complex knowledge in the areas of architecture and urban planning, as well as in the field of environment formation in general (architectural design, town and country planning, preservation of built heritage, structural design, construction work, management and administration tasks, consulting with authorities, teaching, etc.) Within the professional field of architecture, students acquire individual expertise in a specific field and can apply for admission to the DLA&PhD degree program based on their specialization.

During the first five to six semesters students are provided with the groundwork in both human artistic and real engineering fields, and during the remaining semesters they can acquire special knowledge closely related to their qualification - in this phase creative work and its final result, the completed work are dominant.

Examples of subjects during the studies:

1st semester

Building Constructions 1

Construction Materials

2nd semester Architectural Drawing 1

Lectures on Art History

3rd semester

Digital Architecture 1

Architectural Technology & Construction Management 1

4th semester

Design Studio 4

Energy Systems

5th semester

Urban Studies

Building Services Engineering

6th semester

Art History

Load-Bearing Structures

7th semeste

Architecture

Complex Accessibility

8th semester

Landscape and Garden Design

Design Methods

9th semester

Town and Spatial Planning

Design of Interior Spaces

10th semester

Diploma Design Project

General Medicine in English General Medicine in German (Allgemeine Humanmedizin)

Medical School

Degree: M.D.

Duration of training: 6 years (M.D.)

Language of instruction: English/German

Description of the program:

The curriculum of the general medicine course in Pécs is designed to form a foundation upon which the future physician can build his or her medical knowledge in a continuously evolving profession. The program of instruction consists of six years of pre-clinical and clinical studies (ten semesters and one year of clinical rotations). The curriculum is drawn up in the belief that direct experience with patients, either at the bedside or in the operating theatre, is fundamental to a sound medical education.

In the first or Basic module the students become familiar with the structure and functions of the healthy human body. In the second, Preclinical module the formation and features of the pathological processes are studied and the students become acquainted with the basic patient examination skills. In the Clinical module the specific diseases are taught and the diagnostic and therapeutical skills of the students will be developed. Most of these studies are practical in nature, spent mostly in the wards. Clinical rotation is a full practical year in wards. The students carry out mostly medical activity under the control of the teachers.

Basic and pre-clinical module

General natural sciences: biophysics, biostatistics, information technology, metrology, medical chemistry, biochemistry, cell biology, molecular biology, molecular

Medicine: anatomy, histology, embryology, medical physiology, pathology, pathophysiology/clinical physiology, microbiology, fundamentals of immunology, clinical propaedeutics, clinical biochemistry/clinical laboratory diagnostics, medical imaging techniques, first aid, preventive medicine, public health and medical pharmacology. Behavioural sciences: medical ethics, medical psychology, medical communicati-

Core curriculum

Basic clinical module: internal medicine, paediatrics, general surgery, trauma surgery, anesthesiology and intensive-care, obstetrics, neurology, psychiatry, clinical pharmacology, otolaryngology, infectious diseases, medical genetics, clinical oncology, orthopaedics, oxyology, emergency care, dermatology, radiology, ophthalmology, urology, dentistry, introduction to family medicine, forensic medicine and optional subjects.

Examples of subjects during the studies:

on, sociology, social psychology.

English program: USD 16,750 per year (USD 9,000 for the first and USD 7,750 for the second semester)

Description of the program:

Degree: D.M.D.

The curriculum of the five-year program (10 semesters) is designed to unify the basic and clinical sciences, as it is believed that scientific and professional development cannot be sharply separated but should proceed concurrently throughout the program.

In the basic module of first two years the students are taught basic sciences – medical and dental courses – which constitute the foundation of clinical dentistry.

In the pre-clinical module students become more familiar with the intensive clinical study of each of the various disciplines of dentistry that they continue with in the clinical module with more emphasis on the assessment and management of patients. Furthermore, in this final module students participate in elective programs, clinical conferences and hospital-based placements. After the successful completion of the program, students are awarded the title Doctor of Dentistry.

**Please note that the annual tuition fee for Dentistry includes the cost of dental materials/ semester.

Examples of subjects during the studies:

Basic and pre-clinical module

Basic module: foundation subjects (physics, chemistry, biochemistry cell biology), morphology, molecular biology, pathology (general and oral pathology, general and oral pathophysiology, general and oral microbiology, functional biology, behavioural studies (psychology, sociology, ethics)

Pre-clinical module: introduction into clinical studies (internal medicine, surgery, dental pre-clinics), diagnostics, public health (economics), pharmacology (pharmacotherapy, toxicology)

Core curriculum

Clinical module: complex knowledge of diseases and therapies (medical genetics, internal medicine, surgery, dermatology, ophtalmology, ENT, diseases of oral mucosa, paediatrics, obstetrics, gynaecology, neurology, psychiatry, oxiology, etc.) and optional subjects.

Dental clinical module: preventive dentistry, oral diagnostics, maintenance dentistry, oral surgery, restorative dentistry (implants), paediatric dentistry, orthodontics and optional subjects.

Pharmacy in English/German

Faculty of Pharmacy

Degree:

Pharm, D.

Duration of training:

5 years (10 semesters)

Language of instruction: English/German

Description of the program:

The Academic Program offered by the Faculty of Pharmacy leads to the Pharmacy degree with a Pharm. D. title. This program extends over a period of five years (10 semesters). It begins with an introduction to the basic sciences providing a basis for further pharmaceutical studies. In the second part of the program, students take part in general and specialized pharmaceutical education at the university departments, teaching pharmacies, institutes, laboratories and pharmaceutical works.

The Pharmacy diploma entitles its holder to work at public and hospital pharmacies, laboratories, pharmaceutical works, pharmaceutical research institutes, in the international commercial trade of pharmaceuticals, and the management of pharmaceutical materials.

Examples of subjects during the studies:

Basic module

Mathematics, informatics, biostatistics, physics-biophysics, general chemistry, inorganic chemistry, organic chemistry, analytical (qualitative, quantitative) chemistry, physical chemistry, colloid chemistry

Medical-biology module

Pharmaceutical biology, biochemistry, anatomy, physiology, pathophysiology, microbiology, immunology, public health, pharmaceutical botany, first aid, Latin.

Professional module

Pharmaceutical chemistry, pharmacognosy, pharmaceutical analysis, pharmaceutical technology, biopharmacy, pharmacodynamics, administrative pharmacy, clinical pharmacy, pharmaceutical ethics, pharmaceutical care and optional subjects.

Deadline for application:

English program: 30 June German program: 31 May (upon request, late applications might also be considered)

Starting date:

September

Tuition fee:

English program: USD 9,900 (USD 5,200 for the 1st and USD 4,700 for the 2nd semester)

German program: EUR 8,400 (EUR 4,400 for the 1st and EUR 4,000 for the 2nd semester)

Application fee:

English program: USD 200 German program: EUR 200

Registration fee:

English program: USD 220 German program: EUR 220

Applied Management MSc

Faculty of Business and Economics

The program operates with a February start.

Master of Science (MSc/ Honors) Applied Management **Duration of training:**

4 semesters

Language of instruction: English

Deadline for application:

30 November

Starting date:

February

Tuition fee:

EUR 3,750 per semester for non-EU students and EUR 1,300 per semester for EU students

Application fee:

EUR 100

Description of the program:

This program is designed for students who want to deepen their knowledge of business and want to raise it to a higher level. The MSc program is based on the BA program taught in English at UP.

It is possible for ambitious students to enter the program with different business-related backgrounds provided they are willing to work hard. Innovative teaching and learning methods are used in the training and every year each class has a guest lecturer from Europe or the United States. Graduates have the possibility to obtain managerial jobs or continue their studies at the PhD level.

Examples of subjects during the studies:

1st semester

Business Intelligence

Applied Venture Valuation

Strategic Human Resource Management

2nd semester

Production and Process Management Intercultural Business Communication

Project Management

3rd semester

Global Marketing

Business Consulting

Leadership & International Management

4th semeste

Strategic Management

Knowledge Management

Enterprise Development and Entrepreneurship MSc

Faculty of Business and Economics

Degree:

Master of Science in Enterprise Development and Entrepreneurship

Duration of training:

4 semesters

Language of instruction: English

Description of the program

The enterprise development major enables students to engage with the theory of entrepreneurship in relation to how it is practised in Hungary, Europe and also internationally.

The objective of the programme is to develop your knowledge on the methods of screening, analysing, planning and executing the development process of an entrepreneurial venture. Beyond theoretical knowledge, students' skills are advanced in order to enable them to work efficiently in teams, detect and seek opportunities, transform opportunities into executable solutions that can serve as new products and services for the enterprise. Students get acquainted with the process of innovation, work on practical problems in an open innovation environment with social and economic stakeholders in order to make difference in the socio-economic environment. Students interact throughout their studies with other student groups from other universities using state of the art multimedia facilities to learn the application of the info-communication solutions of the 21st century. They also work on social problems to experience social entrepreneurship activities.

Examples of subjects during the studies:

1st semester

Innovation and Innovation Management

Entrepreneurship and Business Model Generation

Corporate Entrepreneurship

2nd semester

Entrepreneurial Finance

Project Management

Advanced Marketing Research

3rd semester

Strageic Management

Start-up Development

E-commerce

4th semester

Applied Venture Valuation

SME Development

Deadline for application:

30 November

Starting date:

February

Tuition fee:

EUR 3,750 per semester for non-EU students and EUR 1,300 per semester for EU students

Application fee:

EUR 100

Registration fee:

794 GBP - 1,569 GBP (depending on the number of students)

Biotechnology MSc

Medical School

Deadline for application: 30 lune

Starting date:

September

Tuition fee:

EUR 5,500 per semester

Degree:

Master of Science in Biotechnology

Duration of training:

4 semesters

Language of instruction: English

Description of the program:

The MSc course aims to educate biotechnologists who possess a high level of theoretical and practical knowledge of biotechnology with medical and pharmaceutical sciences in focus.

The curriculum is practice-oriented and provides the necessary skills for graduates to start work immediately after graduation in the biotech or pharma industries or to enroll in a PhD programme. The programme provides opportunities for students to become involved in research activities in various departments of the Faculties of Medicine and Science or to prepare diploma work in biotechnology-based SMEs (Small or Medium Enterprises) or in the pharmaceutical industry. The University is a member of the European Biotechnology Network, an association which actively supports the program.

Examples of subjects during the studies:

Genetics

Capillary Electrophoresis in Laboratory Diagnostics

Epigenetics - Non-Genetic Inheritance and Its Medical Aspects

Microbiology

Molecular Basis of Microbial

Pathogenesis

Signal Transduction

Urinary Steroid Profiles

Biotechnological Methods

in Forensic Medicine

Enzime Biotechnology

Molecular and Functional Genetics,

Genomics

Molecular Developmental Biology

and Transdifferentiation

Biotechnology from a

Business Perspective

Specialty in Medical Biotechnology

The program provides ample theoretical and hands-on-experience in Molecular Pathogenesis, Drug Research, Toxicology, Transdifferentiation, 3D Tissue Models, Autologous Tissue Transplantation etc.

Specialty in Pharmaceutical Biotechnology

The program suites current industrial needs in the fields of biotechnology, bioproductions and biopharmaceuticals. The training employs the IMT® method and provides industrial certificate

For more information, please contact:

Biology MSc Faculty of Sciences

Degree:

Master of Science in Biology Duration of training:

4 semesters

Language of instruction: English

Description of the program:

The Biology MSc line offers full 2-year-education in biology. The study program for fulltime training offers a complete education in biology, with special directions particularly in molecular biology (neurobiology, genetics, microbiology), and animal and plant ecology. Special directions from the second semester offer more laboratory practice in molecular biology or more courses in ecology. The basic subjects are presented in lectures, seminars and laboratory or fieldwork. The program provides a wider view of the related scientific fields (biophysics, biological chemistry). The students will familiarize their knowledge with the most modern instrumentation in our new research centre. It covers all aspects of education, research and innovation in the fields of biomedical, natural and environmental sciences. It also provides an opportunity to join the research work in 22 different research groups operating in the building.

Examples of subjects during the studies:

1st year

Biophysics lecture

Molecular Cell Biology

lecture and practice

Developmental and Stress Physiology of Plants lecture

Molecular Genetics lecture

Biological chemistry lecture and practice

Regeneration Biology

and Tissue Engineering

Basic Forestry and Forest Research seminar

2nd year

Biotechnology lecture

Conservation Biology lecture

Immunobiology lecture and practice

DNA Techniques

Genomics

Evolutionary Biology lect.

Diploma Work Practice

Cellular and Integrative Neuroscience

practice

Data Processing in Vegetation Science practice

Future Job and Education Opportunities

Further Doctoral Studies in Biology (PhD); Higher education institutions;Research institutes; Health care industry; Food industry; Pharmaceutical industry; Agriculture industry; Biotechnology companies; Nature conservation institutions; Environmental protection institutions.

For more information, please contact:

Contact us

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 4,000 per semester

Application fee:

EUR 140

Chemistry MSc Faculty of Sciences

Deadline for application: 30 June

Starting date:

September

Tuition fee:

EUR 8,000 per academic year (2 semesters)

Application fee:

EUR 140

Degree:

Master of Science in Chemistry

Duration of training:

4 semesters

Language of instruction:

English

Description of the program:

Chemistry Master of Science (MSc) studies can be joined at the Faculty of Science of University of Pécs. The courses are open from September, each year, and are continued during a 4-semester cycle. The students who have studied chemistry, biochemistry, physics, and pharmacy in undergraduate level (BSc) will continue their knowledge at Master of Science level. The subjects of the Chemistry MSc studies include Advanced mathematics, Solid phase physics, Molecular biology, Coordination chemistry, Elemental organic chemistry, Advanced physical chemistry, Instrumental analysis, Theoretical chemistry, Organic chemistry of natural compounds, Surface chemistry, Proteins and protein networks, Advanced chemometry, Environmental technology, Pharmaceutical chemistry, Radiochemistry, and several more specific applied chemistry subjects. The education is composed from theoretical lectures, tutorial seminars and practical sessions. The students in the fourth semester prepare a diploma-work in an experimental topic, which will be defended, and they pass a general final exam for getting the diploma.

Examples of subjects during the studies:

1st vear

Colloid chemistry

Organometallic chemistry

Homogeneous Catalysis

Reaction kinetics

Nuclear magnetic resonance practice

Applied UV-VIS, IR and Raman spectros-

Applied mass spectrometry

Radiochemistry

2nd year

Instrumental Analysis special practice

Theoretical Chemistry

Basics of chemical engineering

Environmental chemistry

Denoted chemical reactions in organic chemistry

Environmental colloid chemistry

Instrumental Analysis special practice

Diploma Work Practice

Future Job and Education Opportunities

Further study opportunities for Chemistry PhD; Research institutes; Higher education institutions; Environment protection companies; Public sector – law and patents; Healthcare; Chemical engineering; Pharmaceutical industry; Industrial chemistry; Food and drink companies; Teaching; Science journalism; Forensic science; Clinical laboratories.

Applied Mathematics MSc

Faculty of Sciences

Degree:

Master of Science in Applied Mathematics

Duration of training:

4 semesters

Language of instruction: English

Description of the program:

The aim of the Applied Mathematics master program is to train professionals who have a well-grounded mathematical and informational knowledge in a theoretically and practical way. They are able to gain knowledge in industrial, commercial, agricultural, logistics, communication, finance and computer science issues to be used for analysis, modelling and finding a solution for them. Furthermore, the best ones are able to keep going on in doctoral level training and deepen their skills and knowledge.

Examples of subjects during the studies:

Fundamentals of algebra and number theory lecture and practice

Fundamentals of analysis lecture and

Geometry and computer graphics lecture and practice

Ordinary differential equations seminar lecture and practice

and practice

System engineering laboratory work and lecture

Mathematics of Networks lecture

Design of Algorithms and Data Structures

Complexity Theory

Statistics and applications seminar

Partial differential equations seminar

Diploma Work Practice

Cryptography lecture and practice

Codes and symmetrical structures lecture

and lecture

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 4,000 per semester

Application fee:

EUR 140

Future Job and Education Opportunities

Higher education institutions - researcher and professors in colleges & universities; Statistical data analysis; Combined defence service (air force, naval academy); Higher Management Position in public sector & banks; Operations research analysts; Computer systems analysts; Data analyst; Financial advisor; Positions in technology-related sector; Actuary; Statisticians.

Physics MSc Faculty of Sciences

Deadline for application: 30 June

Starting date:

September

Tuition fee: EUR 4,000 per semester

Application fee:

EUR 140

Degree:

Master of Science in Physics

Duration of training:

4 semesters

Language of instruction:

English

Description of the program:

In the Physics MSc course, we offer comprehensive knowledge. Those skills and subject groups such as Modern Physics, Optics and Laser Physics, Physics of Quantum Systems, Atomic and Molecular Physics encompass the science of the main areas of Physics based on the bachelor's level of Physics. Practical courses and seminars provide students with hands-on skills.

The seminars and practical courses outnumber the number of lectures in the curriculum. This is a good reflection of our preference for learning methods based upon active student participation. We encourage students' activity with homework, selfproject tasks, and we support cooperative learning methods. The subjects of Quantum Systems and Laser Physics are closely related to the important research areas of the Institute of Physics.

Courses create a foundation for writing theses related to Quantum-Optics, Quantum Informatics, Laser Physics, and Nonlinear Optics and Terahertz Physics subjects and for student research work. Furthermore, students are prepared to enter a doctoral program. A variety of elective and optional courses allow students to deepen their knowledge in subjects that correspond to their individual interests.

Examples of subjects during the studies:

st competer

Mathematical methods in physics practice

Signals and systems lecture and practice Nuclear and partial physics lecture and practice

2nd semester

Atomic and molecular physics lecture Numerical Mathematics seminar

Condensed matter practice and lecture

3rd semeste

Laser physics seminar

Femtosecond and nonlinear optics

4th semester

Quantum optics seminar

Quantum information seminar

Thesis writing

Recreation MSc

Faculty of Sciences

Degree:

Master of Science in Recreation **Duration of training:**

4 semesters

Language of instruction: English

Description of the program:

The aim of the Recreation MSc study program is to train and educate professionals who gain theoretical and practical knowledge that make them able to support wisely all aspects of recreation of healthy people. Professionals who could personally facilitate consumers how to spend sport and cultural leisure time, choose travel destinations and use various types of health-oriented hotel services. They are also involved in the rehabilitation of health-impaired people under medical supervision, during which they can be restored to their full or partial capacity. They have the appropriate knowledge to continue their studies in a doctoral training.

Future Job and Education Opportunities

Sports administrator; Tourism officer; Tourist information centre manager; Summer Camp Instructure; Fitness centre manager; Outdoor activities/education manager; Sports coach; Sports development officer; Theme park manager; Customer service manager; Event manager.

Examples of subjects during the studies:

1st vear

Applied Physiology

Nutritional physiology

The practice, training system and research methods of individual sports

Hotel activities and sports movements with music (fitness, aerobics, body shape forming)

Biomechanics and movement analysis

Orthopaedics

Introduction to recreation theory (theory and methodology of recreation, introduction to communication, management of recreation, mathematics and statistics)

2nd year

Recreation of disabled and disadvantaged Sports tourism and research methodology Basics of internal medicine, cardiology (Medicinal studies I.)

Sport and social sciences

(sports pedagogy)

Design and management of

tourism product

Alternative medicine

The practice, training system and research methods of sport games

Geography MSc Faculty of Sciences

Deadline for application: 30 June

Starting date:

September

Tuition fee: EUR 4,000 per semester

Application fee:

EUR 140

Degree:

Master of Science in Geography

Duration of training:

4 semesters

Language of instruction:

English

Description of the program:

During this 4-semester Master degree program, our students will focus on GIS methods and remote sensing tool applied in surface geomorphology both in a classroom environment and in the field. They will have the opportunity to join in and participate in research and scientific projects run by IGES. The Institute has research collaborations with global companies like ESA and SARMap, and international relations with research groups from Switzerland, Poland, Spain, Slovenia, China and the US. These projects may provide internships for our students to experience the international atmosphere and scientific skills and knowledge.

The master program provides a broad spectrum of geography and related disciplines and combines environmental geography, geomorphology and GIS for all international students. The program also includes a six-week professional practice at self-selected private and public businesses and companies, however, the practice is also available at the university and at the IGES. By completing the professional practice, the student will gain a broad range of practical and project management skills and knowledge to explain, analyse, interpret and execute various planning programs.

Examples of subjects during the studies:

1st vear

Geographical Applications of GIS Landscape Ecology and Land Evaluation

Geographical Approaches in Regional Development

GIS Programming I.

Space, Society and Sustainability

Geomathematics

Regional Geography of the Continents

Engineering and Anthropogenic Geomorphology

and vear

Earth Observation

Geomorphic Systems

Surface Modelling

Applied Geomorphological Mapping

Practical Applications of GIS

Diploma Work Practice

Future Job and Education Opportunities

Due to the Geomorphology/GIS specialization, students may find jobs where the application of either geomorphology, GIS or any related fields are indispensable. Therefore, students may find their future career as a geomorphologist, geospatial analyst, climate change analyst, climatologist, hydrologist, meteorologist, pollution analyst, surveyor, town planner and water conservation officer, among many other jobs out at the job market.

Human Resources Counseling MA

Faculty of Humanities

Degree:

Master of Human Resources Counseling

Duration of training:

4 semesters

Language of instruction: English

Description of the program

The purpose of this course is to educate and train professionals who are experts in providing help to organizations and companies regarding any area of human resources management, one of the functional areas of leadership counseling.

Special attention will be paid to career-planning and counseling, and a major subject is devoted to equal opportunity and the treatment of disadvantaged groups. According to the tradition of this faculty students will also deal with employment policy, adult education as well as the interdependence of education and the workforce market.

From among the practical skills trained the abilities of counseling and conflict management should especially be pointed out. The curriculum also arranges for a compulsory professional field practice, where skills and knowledge acquired may be applied and consolidated in practice.

Examples of subjects during the studies:

Organizational Psychology

The Method of Counseling

The Operation of HR Organizations

Career Guidance

Theory of Human Resources Counseling Practice of Human Resources Counseling

Deadline for application:

15 July

Starting date:

September

Tuition fee:

EUR 1,800 per semester

Application fee:

EUR 140

Degree:

Master of Arts in Psychology

Duration of training:

4 semesters

Language of instruction: English

Description of the program:

The aim of the program is to train professionals, who will be qualified in more branches of psychology and gain special knowledge in the field of Counselling and School Psychology. They will study the methodologies and instruments used in psychology, and will be able to use these with individuals, groups or organizations especially schools for their understanding and development. The program provides adequate training to acquire further, legally stipulated, specialized qualifications in the various fields of psychology. They are prepared to continue their studies at the doctoral level.

The main areas where this degree is applicable: clinical psychology and healthcare services, hospitals, ambulances; individual and group counselling; school psychology; pedagogical centers; coaching; organization development; sport psychology.

Examples of subjects during the studies:

1st semester

Basics of psychodiagnostics and abnormal psychology

Diagnostic Methods in School Psychology Practicum – School Psychology I. -Observation, Assessment

2nd semester

Life Skills Counselling

Practicum – School Psychology II. -Behavior Management

Practicum - Counselling I. - Individual Counselling

3rd semester

Diagnostic Methods in Carrier and Employment Counselling

Talent management and development methods

Practicum - Counselling II. -Family Counselling

4th semester

Theories of Crisis

Art, Creativity, Psychology

Practicum – School Psychology IV. -Work with Special Needs Students

International Relations MA

Faculty of Humanities

Degree:

Master of Arts in International Relations **Duration of training:**

4 semesters

Language of instruction: English

Description of the program:

The goal of the MA degree program in International Relations is to train highly qualified experts with broad education in the social sciences. The graduates of the program have a high level of proficiency in language and negotiation techniques. Their historical, sociological and professional education enables them to think in terms of analysis and synthesis. The knowledge of their subject matter enables them to understand and predict the economic, legal and political processes of the international system. They are able to put the perspectives of the East-Central European region into context amongst the many challenges of international relations. The graduates know and understand the developmental tendencies of the regions outside Europe and have thorough disciplinary knowledge in the areas of civilization, world economy, international law, political science as well as practical skills in diplomacy, protocol and negotiation techniques. Equipped with these pieces of knowledge and skills they are properly qualified to pursue their studies in a doctoral degree program.

Examples of subjects during the studies:

1st semester

European Paradigm from the Ancient Ages to the Present Day

Globalization, Mundialization

International Political Economy

2nd semester

Modern Political Philosophy

International Business

Foreign Policy of the USA

3rd semester

Diplomatic and Consular Relations

Political Geography,

Geography of Security

Political Culture -

International Cultural Relations

4th semester

European Monetary Integration

Theory and Practice of Diplomacy in a Global Context

Specialization

European Studies

Regional and Civilization Studies

Starting date: September

Tuition fee: EUR 2,000 per semester

Application fee: EUR 140

Degree:

Master of Arts in English Studies Duration of training: 4 semesters Language of instruction: English

Description of the program:

The goal of the degree program is to train experts in the field of English Studies who have sound theoretical, methodological and practical knowledge of the English language and can apply such knowledge in practice. They have thorough knowledge and understanding of the literature, culture and the social and political systems of English-speaking countries, including Great Britain, Ireland and Canada, the major trends and research fields of modern theoretical and applied linguistics and their results that mainly apply to the English language. They can apply the acquired knowledge in the business sector, the media, education, diplomacy, at institutions engaged in international relations, in tourism, the publishing sector, tender agencies, local, regional and national government offices and, in general, in the cultural public sphere. They are prepared to pursue studies in doctoral degree programs. The program is offered to full-time students as well as in the form of a correspondence program.

Examples of subjects during the studies:

1st semester

The System of English in a Historical Perspective (seminar)

Research Methodology (seminar) British Socio-Cultural History (lecture)

2nd semester

Current Issues in Literary and Cultural Studies (lecture)

Individual Differences in SLA (seminar)

A Cultural History of Literary Genres in Britain (lecture and seminar)

3rd semeste

Oral and Popular Literature (seminar)

Metaphor and Thought (seminar)

The Gothic and Fantastic in English Literature (seminar)

4th semester electives

New Englishes (seminar)

English Corpus Linguistics (seminar)

Modernism and Postmodernism in the Literatures of the British Isles (seminar)

German Language, Literature and Culture MA (Deutsche Sprache, Literatur und Kultur)

Faculty of Humanities

Degree:

Master of Arts in German Language, Literature and Culture

Duration of training:

4 semesters

Language of instruction: German

Description of the program:

The goal of the program is to provide students with thorough knowledge and skills in the following areas of German Studies:

- The History of German Literature from the Beginnings to the Present Day
- · The History of the German Language
- · Literature Comparatistics
- · German Cultural Studies
- The History of the German Language
- Language Typology
- · Contrastive Linguistics
- · Applied Linguistics

In addition, students can choose as an elective a linguistic or a literature/ culture module in accordance with their main field of interest.

Examples of subjects during the studies:

1st semester

Vergangenheit und Gegenwart der Literaturwissenschaft /Vorlesung

Methoden der Literaturwissenschaft / Seminar

Sprachgeschichte /Vorlesung und Seminar

2nd semester

Repräsentative Epochen und Richtungen in der Literaturgeschichte /Vorlesung Grundfragen der Sprachsoziologie / Vorlesung

Neueste Theorien der Kulturwissenschaft – Überblick /Vorlesung

3rd semester

Schulen, Richtungen und Tendenzen in der Literaturwissenschaft/Seminar

Kontrastive Linguistik /Vorlesung

Medientheorie und Intermedialität / Seminar

4th semester

Interkulturelle und intertextuelle Interpretationen /Seminar

Sprachtypologie /Seminar

Vergleichende Interpretationen literarischer Werke/Seminar

Deadline for application: 31 July

Starting date:

September

Tuition fee: EUR 1,500 per semester

Application fee: EUR 140

For more information, please contact:

German as a Minority Language and Literature MA (Deutsch als Minderheitensprache und -kultur)

Faculty of Humanities

Deadline for application: 31 July

Starting date: September

Tuition fee: EUR 1,500 per semester

Application fee:

EUR 140

Degree:

Master of Arts in German as a Minority Language and Literature

Duration of training:

4 semesters

Language of instruction:

German

Description of the program:

The goal of the degree program is to train experts who have sound general and specialized knowledge and understanding of the history, language, language use, literature, intellectual and material culture and identity of the German minority in Hungary as well as considerable expertise in the German language, literature and culture. The program will also introduce students to the general legal, social and institutional conditions of minority life.

In addition - like in the MA degree program in German Studies - comprehensive know-ledge will be provided in the following

- The History of German Literature from the Beginnings to the Present Day
- Schools, Trends and Genres in the History of German Literature
- · The History of the German Language
- · Applied Linguistics
- Literature, Language and Culture of the German Minorities in Hungary and in the Carpathian Basin
- · Empirical Studies

Examples of subjects during the studies:

1st semeste

Vergangenheit und Gegenwart der Literaturwissenschaft /Vorlesung

Methoden der Literaturwissenschaft / Seminar

Sprachgeschichte /Vorlesung und Seminar

2nd semeste

Deutschsprachige Literatur in Mittelund Südosteuropa /Vorlesung

Dialektologie /Vorlesung

Sprache und Identität der Ungarndeutschen /Vorlesung

3rd semester

Das Rechts- und Institutionssystem der Ungarndeutschen /Vorlesung

Interkulturalität und Mehrsprachigkeit / Vorlesung

Namenkunde /Seminar

4th semester

Interkulturelle und intertextuelle Interpretationen /Seminar

Sprachtypologie /Seminar

Projektarbeit /Seminar

Computer Science Engineering MSc.

Faculty of Engineering and Information Technology

Engineering Information Technologist (MSc)

Duration of training:

4 semesters (full-time training)

Language of instruction: English

The program aims to provide engineers from technical disciplines relevant information about technology sciences as well as skills to pursue a career in computer and information engineering. The program provides a thorough understanding of theory and practice, the study of information acquisition, information systems and technical methodologies and their applications in engineering. The main areas of study include developments in intelligent systems and multiprocessor technology. The program consists of a combination of formal lectures, tutorials and lab sessions; it develops practical and theoretical knowledge and includes supervised work sessions. The course aims to equip graduates with the necessary technical and academic knowledge and skills required for engineering in information technology.

Examples of subjects during the studies:

1st semester

Parallel algorithms and programming

Artificial intelligence 1

Large scale linear systems of equations

2nd semester

Quantum informatics, cryptography

Signals and systems

Database systems

3rd semester

Basics of Environmental Engineering

Computer Vision Systems

Robotic Systems

4th semester

Diploma Work

Specialization

Intelligent Systems

Deadline for application:

15 July

Starting date:

September

Tuition fee:

USD 3,800 per semester

Application fee:

USD 100

Civil Engineering (Structural Engineering) MSc

Faculty of Engineering and Information Technology

Deadline for application: 15 July

Starting date: September

Tuition fee: USD 3,800 per semester

Application fee: USD 100 Degree: Structural Engineer (MSc) Duration of training: 3 semesters Language of instruction: English

Description of the program:

The program is aimed at people who are interested in building- structure; it is open to structural engineers, architects and civil engineers with a corresponding bachelor degree or a degree in a related field of study. The program is based on the Faculty's research of structural science and aims to provide practical and theoretical training in structural engineering. The course content focuses on developing experimental technical skills and computer usage and reflects current trends in structural analysis and design. The training covers research methods for engineers, construction project management, numerical methods, etc. Optional modules are also offered in the field of structural engineering, such as design in steel and concrete, structures and geo-technics, geotechnical engineering.

Examples of subjects during the studies:

Soil-Structure Interaction
Rehabilitation of Structures
Diagnostics of Constructions

2nd semester
Geotechnical Design
Seismic Design
Prestressing Technologies

3nd semester
Thin-Walled Structures
Quality Management 2
Diploma Work

UNIVERSITY OF PÉCS

65

Music Performance MA (Piano, Violin, Flute, Guitar)

Faculty of Music and Visual Arts

Degree:

Master of Arts in Piano / Violin / Flute / Guitar Performance

Duration of training:

4 semesters

Language of instruction: English

Description of the program:

The program focuses on developing music performance skills and artistic qualities on the highest level possible. These programs are for the truly committed – for those young artists who have the aim to be on stage regularly. The goal of the program is to achieve:

- · technical abilities of a real virtuoso,
- · playing stability and reliability,
- detailed stylistic knowledge of all major eras and genres of classical music related to the instrument studied,
- ability to shape the musical process down to the smallest nuances and shades with ease and creativity,
- fundamental respect for the composer's instructions, put into a viable combination with the performer's own ideas and personality.

In addition to solo performance, chamber music also has an emphasized role in the program. Complementary subjects such as music history, analysis or composition practice serve to further widen the theoretical knowledge of the student.

Examples of subjects during the studies:

Basic Module

Music History

Folk Music

Professional Obligatory Module

Analysis

Composition - Style Studies

Studies on Professional Practice

Chamber Music

Chorus / Orchestra

Differentiated Professional Subjects

Major Subject

(Piano, Guitar, Violin, Flute)

Performance Practice (for concerts)

Optional Subjects

Instrument Knowledge - for piano major

Improvisation - for piano major

Guitar Harmony and Continuo Playing – for guitar major

Lute Tabulature and Intavolation Reading and Transcription Methodology – for guitar major

Gregorian Chant

Medieval Polyphony

Deadline for application:

15 July

Starting date:

September

Tuition fee:

EUR 3,000 per semester

Choral Conducting MA

Faculty of Music and Visual Arts

Deadline for application: 15 July

Starting date:

September

Tuition fee: EUR 3,000 per semester

Application fee: **EUR 100**

Degree:

Master of Arts in Choral Conducting

Duration of training:

4 semesters (120 ECTs)

Language of instruction: English

Description of the program:

The activity of choral conductors holding a degree belongs to the field of choral art. It involves forming new ensembles, leading different types of choirs, actual conducting work. Basically it means to head and manage the artistic work of a choir in the long term with high efficiency. In choral work choral conductors can use their theoretical knowledge, their vocal and partly their instrumental abilities as well. They will be prepared to play an active role in the nourishing choral culture.

Besides general music theory and music history classes, the training will introduce students to the technique of choral conducting as well as to the theoretical and practical issues related to the human voice, voice formation and maintenance, the history of choral music, repertoire, different styles and all the related know-how in all branches of choir music. Choral conducting and learning it at a high level requires personal skills artistic sensitivity, having a good ear, knowledge of music and, most of all, the individual's singing culture and knowledge about chamber music.

Examples of subjects during the studies:

History of Vocal Music, Folk Music Musical Pieces / Performance Visiting

Piano

Choral Education and Management

Differentiated Professional Subjects

Conducting Techniques

Choral Conducting

Orchestral Conducting

Methodology of Choral Conducting

Optional Subjects

Theory of Art

Art History Special Course

Stylistic Knowledge

Aural Training

Gregorian Chant

Medieval Polyphony

Classical Singing MA

Faculty of Music and Visual Arts

Degree:

Opera Singer

Duration of training:

4 semesters

Language of instruction:

English

Description of the program:

Among other courses, the theoretical fields to be covered include Music History, Folk Music, Contemporary Culture, Analysis, but students also visit concerts and take part in composition practices. The objective of the major subject (Solo Singing) course is to establish a repertoire for the students, adequate to their vocal types and also to develop their musical expression skills, knowledge on styles and recital skills. Several courses also develop a variety of skills related to acting.

Examples of subjects during the studies:

Contemporary Culture

Music History, Folk Music

Literacy / Performance Visiting

Professional Obligatory Module

Analysis

Composition - Style Studies

Chamber Music

Major subject (Opera singing)

Singing with piano accompaniment

Stylistic Knowledge

Acting

Optional Subjects

Theory of Art

Art history

Gregorian Chant

Ceramic Design MA

Faculty of Music and Visual Arts

Deadline for application: 15 July

Starting date: September

Tuition fee: EUR 3,000 per semester

Application fee: EUR 100

Degree:

Master of Fine Arts in Ceramic Design

Duration of training:

4 semesters

Language of instruction:

English

Description of the program:

During the Ceramic Design courses students are introduced to a wide range of silicate materials from classical materials of ceramic design up to concrete. The Ceramic Department of the Faculty of Music and Visual Arts at the University of Pécs has a close partnership with, and is located at the same site as the world famous Zsolnay Porcelain Factory in Pécs. Various types of forming methods from handcrafting to design and spacious art studios together with academic level personal tutoring provide the students with the opportunity to find their own artistic ways.

APRN Nursing MSc (Nurse Practitioner)

Faculty of Health Sciences

Degree:

Master of Nursing APRN (Nurse Practitioner)

Duration of training:

3 semesters

Language of instruction: English

Description of the program:

A Nurse Practitioner/Advanced Practice Nurse is a registered nurse who has acquired the expert knowledge base, complex decision-making skills and clinical competencies for expanded practice, the characteristics of which are shaped by the context and 6or country in which s/he is credentialed to practice. A Master's degree is recommended for entry level

Beginning in September of the 2019/20 academic year we will launch several of the following specifications of the APN, within the training program of Nurse Practitioner:

- Nurse Anesthetists
- · Primary Care Nurse Practitioner
- · Emergency Care Nurse Practitioner
- · Acute Care Nurse Practitioner

Examples of subjects during the studies:

Conceptualisation and Integration of Evidence dor Advanced Nursing practice Scientific Underpinnings of advanced Nursing Practice

APRN Role in the Health Care delivery System

Advanced Pharmacotherapeutic

Advanced Health Assesment for the Nurse Practitioner

Advanced Health Assesment and Clinical Reasoning

Advanced Physiology and Pathophysiology

Nurse Practitioner Practicum I.

Business Administration PhD

Faculty of Business and Economics

Deadline for application:

30 June

Starting date:

Autumn semester

(The starting of the consultation period will be announced later, it depends on the number of applicants.)

Tuition fee:

1st semester: EUR 4,000 2nd semester: EUR 3,000 3rd semester: EUR 2,000

4th semester -

Doctoral examination: EUR 500 Doctoral procedure: EUR 3,000

Degree:

PhD in Business Administration

Duration of training:

4 semester educational period + the research period Language of instruction: English

Description of the program:

The International PhD Program is aimed at professionals in business or public administration having several years of experience in their field, but not necessarily in research or education.

The International PhD Program combines the advantages of contact-based and distance-based education drawing on the contribution of recognized national and international experts. In its design, the program combines two major international traditions in doctoral education such as the American tradition (where several years of formal education is needed to get the PhD) and the European tradition (as a rule, with a limited number of classes and a strong emphasis on independent dissertation research).

For more information, please contact:

NIVERSITY OF PÉCS international.pte.hu :

Regional Development PhD

Faculty of Business and Economics

Degree:

PhD in Regional Development

Duration of training:

4 semesters

Language of instruction: English

Description of the program:

The PhD Programme in Regional Development is for professionals who have collected several years of experience in their field, working at national, regional and local levels of decision making or at thinktank organizations. The programme is designed to help students acquire the skills and knowledge necessary for writing good quality doctoral dissertations. It supports independent research by providing experienced faculty supervisors and professional feedback at dissertation seminars.

The duration of the program is four years: two years intensive studying and attending classes, and two years research. Classes are held in the first two years on a semester basis with two weeks' intensive teaching period in each semester. After these two weeks, students have to work on the assignments to satisfy the requirements of the courses. Following the first two-year study period students can start their research after successfully passing a complex exam. This way the program combines the advantages of faceto-face education and distance learning. There are already successful PhD students with Stipendium Hungaricum scholarship who obtained the certificate.

The International PhD Program in Regional Development combines the advantages of contact-based and distance-based education drawing on the contribution of its recognized national and international faculty. The educational period consists of four semesters. During this period students should spend in each semester approximately 5 days on campus to attend and prepare for classes, consult with their research supervisors and continue their research

Deadline for application:

30 June

Starting date:

September

Tuition fee:

1st semester: EUR 4,000 2nd semester: EUR 3,000 3rd semester: EUR 2,000 Doctoral examination: EUR 500 Doctoral procedure: EUR 3,000

Doctoral Programs in Medical Sciences

Medical School

Deadline for application: 17 May

Starting date:

September

Tuition fee:

USD 6,000 per semester

Application fee:

USD 250

Registration fee:

USD 200

Degree: PhD Duration of training: 4+4 semesters Language of instruction: English

Description of the program:

The structure of the PhD programs of the Medical Faculty is similar to those of most European and American universities. The doctoral (PhD) degree, as the highest qualification attainable at university, is conferred by the University of Pécs on those who have given evidence of having acquired sufficient practical skills and theoretical knowledge to conduct scientific research independently.

Graduation Requirements:

The PhD degree is conferred by the university after the candidate has completed the required courses, and defended the PhD thesis based on research work. A first authorship paper (published in a peer-reviewed journal) on the findings included in the theses, is required.

Available PhD programs:

- · Basic Medical Sciences
- · Clinical Medical Sciences
- · Clinical Neurosciences
- Interdisciplinary Medical Sciences
- Pharmacological and Pharmaceutical Sciences

Doctoral Program in Health Sciences

Faculty of Health Sciences

Degree: PhD Duration of training: 8 semesters (4 years) Language of instruction: Hungarian and English

Description of the program:

"Interdisciplinarity is a major feature of our Doctoral School, as almost all sub-disciplines of Health Sciences are represented within the eligible research areas.

Our mission is to provide support to our students in their research field assisting them with their scientific work, publishing novel results, international dissemination and getting acquainted with the most recent protocols and methods. The school motivates PhD students to take part in national and international project applications. Through our international contacts we give our PhD students opportunity for mobility and to gain experience abroad and to expand their scientific contacts.

The PhD students are involved in the scientific research of the supervisors and scientific members of the Doctoral School. The research topics are continuously being expanded due to the new results achieved by the PhD students. These novel results will be integrated into the research topics."

Doctoral Program in Chemistry

Faculty of Sciences

Degree: PhD Duration of training: 8 semesters Language of instruction: English

Description of the program:

The Doctoral School of Chemistry offers a four-year training and research program in a wide range of fields in chemical sciences, Analytical Chemistry, Bioorganic Chemistry, Homogeneous Catalysis, Chemistry of Coordination Compounds, Electrochemistry, Synthetic Organic Chemistry, Theoretical Chemistry, Environmental Chemistry, Biochemistry, and Separation Science. The chemistry program began in 1993 and since then the students have had access to all modern techniques, could take part in international scientific research programs, which leads the outstanding students to obtain a PhD degree upon complying with the requirements of their studies.

Faculty of Sciences

Deadline for application: 24 May

Starting date: September

Tuition fee: EUR 3,000 per semester

Application fee: EUR 140 Degree: PhD Duration of training: 8 semesters Language of instruction: English

Description of the program:

The Doctoral School of Earth Sciences offers a four-year training and research program in various fields of geography, geology and meteorology. Students can choose from a wide selection of research topics from the three subprograms of Physical geography, geology and meteorology; Human geography; Geopolitics, Geo-economics and political geography. Outstanding students can obtain a PhD degree after completing their studies and research activities. The program began in 1994 and since then more than 100 researchers have received their PhD degree and joined the alumni network of the Doctoral School.

Doctoral Program in Physics

Faculty of Sciences

Degree: PhD Duration of training: 8 semesters Language of instruction: English

Description of the program:

The Doctoral School of Physics covers the fields that are the subjects of research in the Institute of Physics; namely, laser physics, including THz and X-ray laser research, nonlinear optics, generation of ultrashort laser pulses, laser based acceleration of particles, quantum informatics, theoretical atomic and molecular physics. World-leading research on high-energy THz pulses and their applications has a strong tradition at the Institute. There is a close collaboration between the doctoral school and three institutes of the Hungarian Academy of Sciences: both the Institute for Solid State Physics and the Institute for Particle and Nuclear Physics of the Wigner Research Center, and the Institute for Technical Physics and Material Science, further the Extreme Light Infrastructure (ELI-ALPS) Institute in Szeged, as well as several international scientific collaborators and local industrial partners.

Students will be able to synthesize theoretical and empirical studies, conduct their own research, and present them both orally and in written form.

Deadline for application: 24 May

Starting date: September

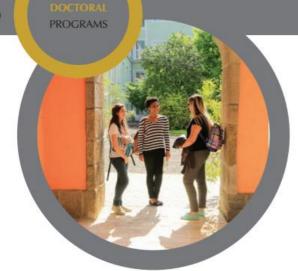

Tuition fee: EUR 3,000 per semester

Application fee: EUR 140

For more information, please contact:

internationally recognized ECL language exam (upper-intermediate or advanced) Degree: Non-degree course Duration of training: 5/10/15 months (see below) Language of instruction: English

Range of preparatory programs:

- Medical Preparatory for Dentistry, Pharmacy, General Medicine, Nursing, Physiotherapy, Midwifery, Dietetics, Biology, Medical Biotechnology (MSc)
- Business and Economics Preparatory for Business Administration
- Engineering and Information Technology Preparatory for Architecture, Engineering Information Technologist, Civil Engineer, Electrical Engineering
- Humanities Preparatory for International Relations, Psychology, English and American Studies, Social worker

General overview of Preparatory Programs

Complex and integrated preparatory programs are offered for degree studies that meet the language development needs of international students, prepare them for the academic entrance exam requirements and facilitate their integration into the context of higher education in Hungary.

Our preparatory programs are made up of three stages, each comprising 400 lessons:

- 1) The Milestone Stage
- is designed for students who need additional support in meeting the minimum requirements in English.
- 2) The Upgrade Stage

focuses on language development in a manner that resembles more the academic context awaiting you. 400 contact hours are spent with thematically focused language education assisting you to attain upper-intermediate (B2) level.

3) The Gateway Stage

is specifically designed for students with outstanding English skills (already reaching or exceeding B2 level).

Program Length	Study Stages	Starting Date	Tuition Fee	
5 months / 400 lessons	Gateway	January	4,200 EUR	
10 months / 800 lessons	Upgrade + Gateway	September	6,500 EUR	
15 months / 1200 lessons	Milestone + Upgrade + Gateway	January	9,300 EUR

Postgraduate Certificate in Reflective Recovery Studies

Description of the program:

Reflective recovery specialists work in diverse community settings designed to provide a variety of counseling, rehabilitation, and support services. Their duties vary greatly, depending on the setting in which they work and the population they serve. Although the specific setting may have an implied scope of practice, reflective recovery specialists are frequently challenged with children, adolescents, adults, or families that have multiple issues, such as mental health disorders and addiction, disability and employment needs, school problems or career counseling needs, and trauma. Reflective recovery specialists must recognize these issues in order to provide their clients with appropriate counseling and support.

Postgraduate Certificate in Urban Social Development

Description of the program:

The objective of the study program is to provide professionals with theoretical and methodological tools and thereby enable them to actively participate in special policy making, to apply innovative and complex approaches in determining developmental goals and in elaborating strategies; and to actively take part in implementation in social areas of urban development.

Pécs Summer School 2019

In 2019, the University of Pécs is offering exciting and unique summer programs for students who want to earn credits while having fun!

Simonyi Summer Social Entrepreneurship Program

June 17 - July 6

BUSINESS

The SSSEP 2018 focuses on creating socio-economic value in the region surrounding the University of Pécs. Participants will provide professional support to social entrepreneurship initiatives that can have real social impact in the region. They will cooperate with culturally and professionally diverse student groups in a practice-oriented, experiential learning context that focuses on real-life projects, collaborating with project owners in the region.

European Challenges in the 21st Century - How to Move Forward? June 27 - July 6

SOCIAL SCIENCES

This course examines the changing intercultural climate within the European Union in light of global challenges and pressures such as the ongoing refugee crisis, transnational terrorism and regional cooperation across Central and Eastern Europe, especially within the Visegrad Four. Globalization, or more precisely, "Glocalization," will be discussed from various identity-related angles, including the perspectives of university cities bearing the title "European Capital of Culture."

The Cultural Heritage of Hungary

June 30 - July 14

The objective of the summer program is to introduce the Hungarian cultural heritage from many different perspectives. Students will learn about the history of Hungary, as well as about the current political, economic and societal challenges of the country. They will also gain insight into the Hungarian folk traditions, classical and folk music, the gastronomy and the famous Hungarian wine culture.

UNIVERSITY OF PÉCS

XX. Hungarian Language and Culture Summer University

July 21 - August 18

LANGUAGE LEARNING

Would you like to learn Hungarian in an interesting, effective and interactive way? Register for our Hungarian Language and Culture Summer University to learn not only the language but also receive current information about Hungarian culture, cuisine, traditions and much more! Groups are small and multicultural, so students receive personalized feedback. Learn our unique and interesting language in the natural language environment and learn more than just a language!

Undergraduate, graduate and PhD students

CUSTOMIZED SUMMER PROGRAMS

Organized for our partner institutions

Summer Program in English Language and Education

This is the second time we will hold the 4-week-long summer course for the 35 students of our Chinese partner university. The program seeks to improve academic English skills and will give insight into the theory and practice of education.

The Cultural Heritage of Hungary and Europe

This 2-week-long summer course will be held for the 20 students of a Chinese partner university. The academic program focuses on cultural studies and includes dynamic field trips and excursions to cultural sites of Pécs, Baranya and Budapest.

Hungarian Folk Music and Folk Dance

This is the second time we offer the 10-day-long summer program to the students of a Japanese partner university. This academic and entertaining summer course provides students with insight into Hungarian folk tradition and includes a special Hungarian dance program with traditional live music.

Study Abroad programs for incoming students

The University of Pécs offers a wide range of semester/year-long, high quality Study Abroad Programs for the incoming international students that explore different topics in various educational fields.

Our Study Abroad programs enable you to combine a period of residence abroad with an educational program for which you will gain academic credits towards your degree in your home university.

The following semester/year-long Study Abroad programs are available in English:

Architecture BSc + MSc (single cycle program)	Civil Engineering BSc	Electrical Engineering BSc
Structural Engineering MSc	Computer Science Engineering BSc	Computer Science Engineering MSc
Business Administration BA	Applied Management MSc	Enterprise Development and Entrepreneurship MSc
Tourism and Catering BSc	Psychology BA	International Relations BA
International Relations MA	English and American Studies BA	English Studies MA
Social Work BA	Pharmacy (Pharm.D.)	Nursing BSc
Midwifery BSc	Physiotherapy BSc	General Courses for all Majors in Health Sciences
Classical Music Performance BA/MA	Sculpture (single cycle MA)	Ceramic Design MA
Painting (single cycle MA)	Biology BSc	Chemistry BSc
Geography BSc	Earth Sciences BSc	Mathematics BSc
Computer Science BSc	Physics BSc	Physical Training BSc
Physical Education Training BSc	Legal Issues in an International Context	

One program consists of many different courses. One course represents between 2-9 ECTS credits per semester. The tuition fees of the Study Abroad programs range from 80 USD to 130 USD/ECTS credit per semester depending on the chosen area of study.

Period of Study

The first step is to decide how long you wish to study abroad. There are three possible study options we can offer you:

Study option	Length	Study period	
1.	Whole academic year	September – June	
2.	Autumn (fall) semester	September – December	
3.	Spring semester	February – June	

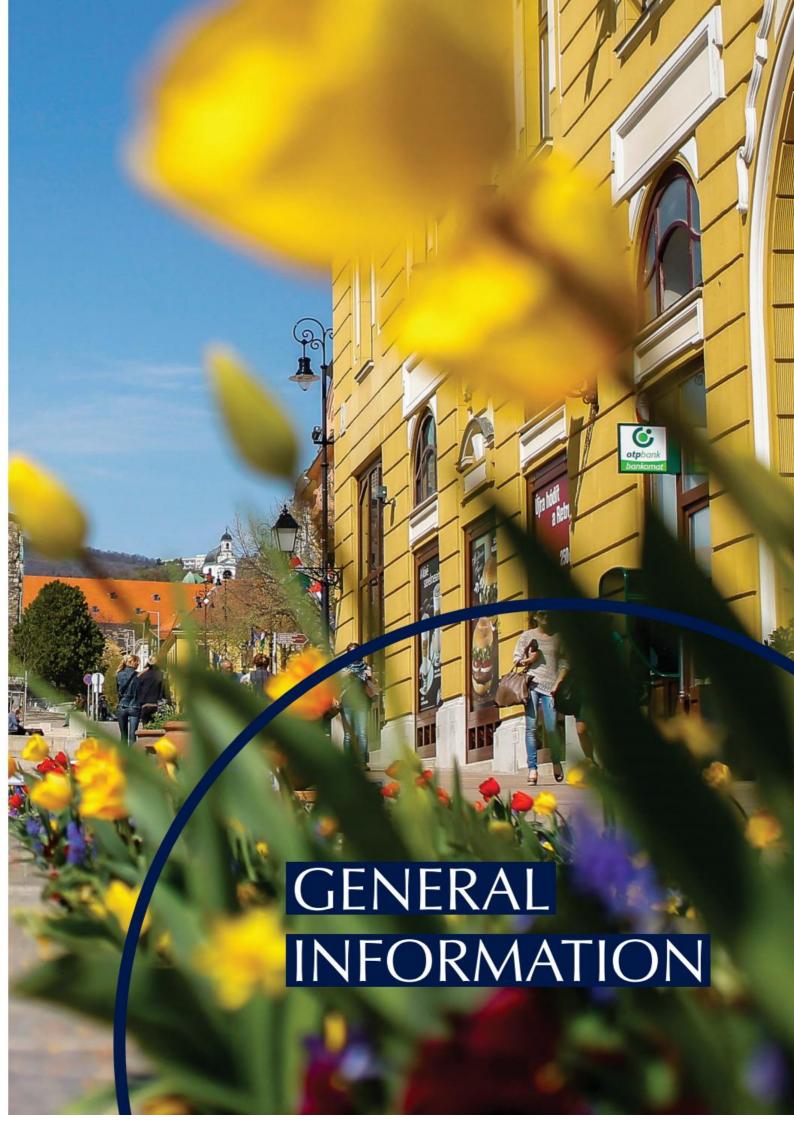

The University's standard academic year runs from September to June, with teaching taking place in two semesters.

How to Apply

Before applying to UP, you should carefully read through the admission requirements for the study program you want to follow. Check the specific requirements for your study program on the website:

www.international.pte.hu

Please, read the guidelines provided in this section before submitting your application for a study program.

You can apply for any of our non-medical study programs through the application website:

apply.pte.hu

Please note, that the application for the programmes of the Medical School (General Medicine, Pharmacy, Dentistry, Biotechnology, Humanmedizin, Zahnmedizin, Pharmazie) goes on a different surface. You can learn more about it at: admissions.medschool.pte.hu

- 1. CHOOSE one from our offered programs.
- READ the admission requirements for the study program to which you are applying.
- COLLECT all the required documents.
 Information on the required documents of each program can be found on the individual program page at www.international.pte.hu.
- 4.REGISTER on our application site (apply.pte.hu or admissions.medschool.pte.hu/en/applicationform), fill the application form, upload the necessary documents and submit your application!
- After you have submitted your application, you are going to receive a notification about the application fee payment.
- When we receive your application fee, we start the evaluation of your application and invite you to the entrance exam or Skype interview.
- 7. If you succeed on the entrance exam/Skype interview, you receive the Conditional Acceptance Letter and a notification for tuition fee payment.
- 8. When we receive your tuition fee, we issue you the Letter of Admission and you can start arranging your travel to Pécs.

Stipendium Hungaricum Scholarship Program

The "Stipendium Hungaricum" Scholarship Program was founded by the Hungarian Government in 2013.

You can apply for the scholarship if your country has a valid/effective bilateral educational work plan agreement signed with the Hungarian Ministry of Human Resources.

For more information, please, visit the website of the Stipendium Hungaricum Scholarship Program:

www.stipendiumhungaricum.hu

Fees and Funding

All international students, registered for a degree program, pay a tuition fee to the University of Pécs. Please find the tuition fees of the different international programs on the individual program pages or under the following link: international.pte.hu/tuition_fees

To apply for a degree program at the University of Pécs, you will need to pay a non-refundable application fee. Once the university has received your application fee, we can begin processing your application. Some programs require a registration fee as well, which should be paid once in the first semester of the studies. This is also a non-refundable payment.

The notifications sent by the university about the application fee and tuition fee payments contain the bank details.

UNIVERSITY OF PÉCS international.pte.hu 9

Accommodation

ons.

Further to accommodation in Pécs, incoming students have two basic options. They may stay in a dormitory or seek alternative accommodation.

Staying in a dormitory

The University of Pécs has ten dormitories. They are located in quiet, residential areas of the city. The Faculties of the University as well as the city center are easily accessible from the dormitories. Most of the dormitories have recently been renovated. The rooms are nicely furnished and contain bathrooms. Bedclothes are supplied. Rooms are offered on a reasonable price level: approximately EUR 140 per month.

Facilities:

- · internet access per room
- · study room
- lounge
- gym
- · bike storage
- · parking slots
- · cafeteria
- · student club

Rented accommodation

For incoming students who require superior quality accommodation, rented flats are an alternative. Renting a flat can provide students with the peace, comfort and privacy they require.

There are numerous private companies in Pécs which offer a free apartment-finding service for students. They have a large database of apartments for rent in Pécs from 35,000 HUF/month.

What they offer:

- · houses, apartments and flats for rent
- · roommate search
- apartment listings
- · they make appointments with the landlords
- · they take you out by car to view apartments
- · they give you a rental contract

Useful websites:

http://www.studenthousing.hu/ http://ihingatlan.hu/

Living Expenses

The costs of a stay in Hungary have generally been considered low by European standards. To be able to pay your rent, buy proper food and afford an occasional evening out, you need a minimum of HUF 120,000 (≈EUR 400).

Here is a list of essentials to get an idea of prices:

Food

- a meal in the university canteen: HUF 600-1,000 ≈ EUR 2-3.5
- a meal in a restaurant: HUF 1,200-4,000 ≈ EUR 4-13
- one liter of milk: HUF 200 ≈ EUR 0.7
- one bottle of beer: HUF 250-450 ≈ EUR 0.8-1.5
- one bottle of red table wine: HUF 600-1,500 ≈ EUR 2-5
- one liter of bottled water: HUF 100–150 ≈ EUR 0.3-0.5
- one loaf of bread: HUF 200 ≈ EUR 0.7

Transport

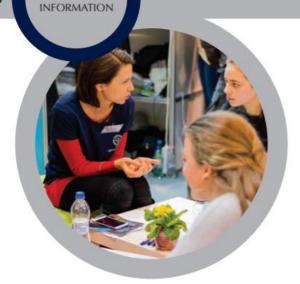

- one liter of petrol: HUF 400-430 ≈ EUR 1.5
- a monthly bus pass for students: HUF 3,710 ≈ EUR 12
- a single ticket (bus): HUF 350 ≈ EUR 1 (or HUF 500 ≈ EUR 1.5 from the bus driver)
- a one-way train ticket to Budapest with a student discount: HUF 2,635 ≈EUR 8.8
- a taxi ride within city limits: HUF 900-1,500 ≈ EUR 3-5 (depending on the distance)
- shuttle transport from the Budapest Liszt Ferenc Airport to Pécs: HUF 7,500-HUF 9,000 ≈ EUR 25-30 (depending on the company and the number of passengers)

Entertainment

- entrance fee to a party: HUF 0-1000 ≈ EUR 0-3.5
- a cinema ticket: HUF 700 1,400 ≈ EUR 2.5-4.7
- a theatre ticket: HUF 1,000-2,500 ≈ EUR 3.5-8.5
- cinema with student discount: HUF 1040 \approx EUR 3.5 for a normal, HUF 1390 \approx EUR 4.7 for a 3D film
- swimming pool: The Swimming Pool of the Faculty of Engineering and Information Technology is free for the students of the University, other swimming pools: HUF 800-2200 ≈ EUR 2.7-7.4
- ice skating (3 hours): HUF 700 ≈ EUR 2.5

Other

- renting a flat per month: HUF 35,000-100,000 ≈ EUR 110-320
- · library card: free for students

Student Services

Studying abroad can be hard. You are far from home, everything seems to be a bit odd, a bit strange, and you can feel lonely sometimes. But don't worry, this is normal, and it happens to everyone. We have developed some tools for you to make your transition as smooth as possible.

BUDDY PROGRAM

GENERAL

The Erasmus Student Network (ESN) Pécs has launched its 'Buddy Network' project in the spring of 2015. The personal tutors (buddies) give international students assistance in their integration into the university environment. Buddies help with practical matters such as opening a bank account, applying for residence permit and finding accommodation. The possibility to have a 'buddy' is given for all the international students.

Additionally there is a great variety of free time activities, cultural and social programs offered by the ESN organization to international students.

CULTURAL SENSITIZATION

Our Faculty of Cultural Sciences, Education and Regional Development organizes five English-taught courses open for every student of the university in order to help the understanding of Hungarian culture, society and to get a glimpse of the current social and political issues here. You will be able to attend these courses for free.

- Intercultural Communication, Etiquette, Protocol and the Rules of Social Interaction in Hungary
- Current Political, Economic and Social Issues of Hungary
- 3. Contemporary Hungarian Culture
- 4. Cultural Heritage of Hungary
- 5. Cultural Heritage of Pécs

For more information on these courses, please visit:

kpvk.pte.hu/content/cultural-sensitivity-program

STUDENT COUNSELLING

Student Counselling is considered an invaluable service within the University of Pécs. Its primary objective is to provide students with professional, discreet and responsive psychological counselling. The service is intended to offer counselling to students enrolled in the English language programme and seeks to render professional assistance to students struggling with a plethora of challenges and difficulties evolving from potential changes and upheavals in their personal lifestyles and studies. Our service can aid students seeking professional aid who express control of their routine lifestyle, yet are faced with temporary obstacles which seemingly they are not best equipped to solve on their own initiative. The service is free of charge and guarantees complete discretion.

You can find out more about this service at

counselling.pte.hu

The CLAC (Campus Legal Aid Clinic) was launched in 2015 in order to deepen the academic knowledge of law students, at the same time it provides professional and monitored legal advice for the students of UP. In the past years, a number of foreign students have turned to the law clinic for legal advice. In a personal meeting they can consult their legal problem with selected law students. Then they get supervised legal advice from a professor of law. This piece of advice and possible solutions are introduced and explained by the law students to the client.

There is a possibility to give legal advice and carry out consultancy in both English and German languages.

If you have a question or problem in connection with your lease agreement, equal treatment or other civil wrongs, then do not hesitate to contact us, we do our best to assist you with your legal problem.

CAMPUS LEGAL AID CLINIC

You can learn more about the Campus Legal Aid Clinic at

www.legalclinic.hu

The Foreign Language Centre at the University of Pécs has two major activities. It provides various language courses for the student community of the university and for the people of Pécs and it also functions as the international center of the ECL Language Exams.

The Foreign Language Centre, in support of the University and the city of Pécs, regularly organizes language courses to teach the necessary skills to effectively communicate in our world. The study courses featuring English, German, French and Japanese include two main types: general language courses and exam preparatory courses. Students of the University of Pécs can take advantage of taking the courses at a reduced price.

The Foreign Language Centre is the international center of the ECL examinations, ECL standing for "European Consortium for the Certificate of Attainment in Modern Languages". The ECL exams can be taken in English, French, German, Hungarian, Italian, Polish, Rumanian, Bulgarian, Serbian, Slovak, Russian, Spanish, Croatian, Czech and Hebrew. The ECL language exam has been acknowledged as an international qualification, which can be offered for undergraduate admission in the United Kingdom. Students of UP may take this exam at a reduced price.

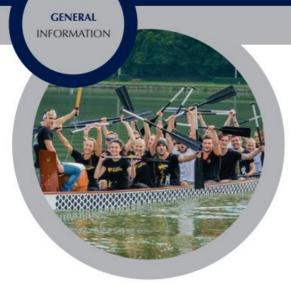

FOREIGN LANGUAGE CENTRE

For more information on the ECL language exam, please visit:

www.ecl.hu

SPORTS

To maintain the level of intellectual achievements and endure daily pressure, it is necessary to have ample opportunity for recreation and regeneration. Sporting life at the University is coordinated by the TTK Sport Centre University of Pécs, which offers a wide range of sporting opportunities to the students and staff.

International students can pursue the following sports while studying at the University of Pécs: aerobics, table tennis, women's handball, men's handball, women's basketball, men's basketball, soccer, martial arts, women's volleyball, men's volleyball, archery and fencing.

Besides the above mentioned courses, you are free to use the various sports facilities of the University (e.g. indoor and outdoor swimming pool, gym, sport halls). However, the usage of these halls and grounds might be sometimes restricted according to regular class schedules.

More information can be found at

pte.hu/english/sports

THE DANCING UNIVERSITY

The Dancing University of the University of Pécs is a unique initiative in Hungarian Higher Education. Any student, lecturer or staff member of the University is eligible to participate in a dancing course free of charge.

For more information, please visit the website:

tancolo.pte.hu/en

STUDENT ORGANISATIONS

There are many different student organisations which you can join whilst studying at UP. These offer a wide variety of professional and leisure programs which give you a good opportunity to meet local people, make new friends and enjoy memorable experiences.

The **Student Union** is the official representative institution of university students. The University Student Union (EHÖK in Hungarian) is in charge of student affairs at a university level. They represent the students' interests in the highest decision making bodies, they manage the university level scholarships, the non-freshmen dormitory places, and they organize the bigger cultural and sport events, like the Pécsi Egyetemi Napok (PEN) which is the biggest regional festival held every May.

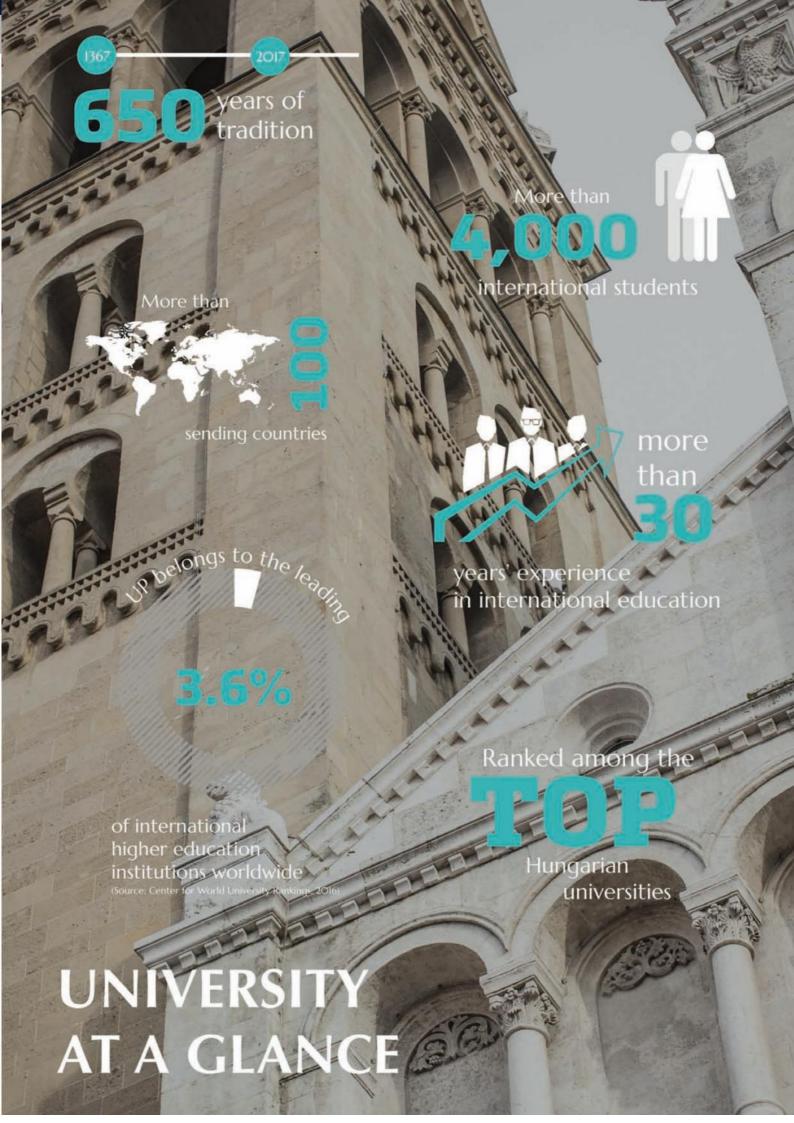

As an international student, you will meet other student organizations as well. One of them is the ESN (Erasmus Student Network) organizes weekly events and bigger trips around Hungary especially for international students to have a closer look at the Hungarian cultural and historical heritage and to visit the most beautiful sights all around the country.

The AGEE, the largest European student organisation offering opportunities for learning, travel, recreation and building relationships at both local and international level.

As the largest global student organisation, AIESEC offers a wide variety of professional programmes and – uniquely - internship opportunities for students of the University of Pécs.

For more information on the student organizations of the UP, please visit:

pte.hu/english/international_student_organizations
